

February 20, 1934

Dr. Graham Edgar
Ethyl Gasoline Corporation
Chrysler Building
New York City
New York

Dear Dr. Edgar:

Following our conversation of this morning, I called up Mr. Charles Bell of the legal firm mentioned by you in Bowling Green and after a bit of conversation with him, it was tentatively arranged that he was to come to Cincinnati in order to acquaint himself with the available facts with regard to the lead exposure associated with the handling of Ethyl Gasoline, and at the same time to acquaint me with the details of the case which is troubling him. At this time we can decide what we can do to be of assistance to him, and I will keep you fully advised of what develops.

Very truly yours,

RAK:IS

Robert A. Kehoe, M.D.
