REMARKS

Had a real run around here. Was in area so checked in to see how they were doing on basic evaluations of fibers and fillers. This is the Basic Research Lab of Brog Warner and is a real blue sky outfit.

Upshot of visit is that Rick Manteufel who was woring on the fiber-filler evaluation is gone. Not replaced. All I could learn was that all work on asbestos containingproducts has been stopped. They feel that the Fed Govt will put a total stop to use of asbestos in the next year or two. An ugly thiggto think about.

L Rick Rec'd
