M. J. Jackson, Executive Assistant

SUBJECT Washington Workshop VI

DATE October 1, 1981

Enclosed is a preliminary program for AACPP's Washington Workshop. We regret the late date. However, a decision to go forward with the Washington Workshop was not finalized until the September 1, 1981, Executive Committee Meeting. Nonetheless, we think you will find this year's program as interesting and informative as in past years.

After reviewing the program, those of you who have not responded or responded in the negative may wish to reconsider. If so, please contact me as soon as possible.

**AACPD
WASHINGTON
WORKSHOP**

LLOYD AMBLER
Chairman of the Board, AACPP

CertainTeed Corporation
Senior Vice President
National Sales

This year has been marked by changes in the federal sector which present the private sector with unique opportunities and challenges. The philosophical turnabout in fiscal and regulatory policy ushered in by the Reagan Administration has made possible a greater degree of interface between government and industry. Yet, at the same time, proposed budgetary cuts will impact on the already depressed state of the construction industry and, in turn, the A/C pipe business. Now, more than ever, it is essential that a constructive dialogue take place between government and industry representatives so reasonable, viable solutions to mutual problems are forthcoming. This year's Washington Workshop will explore what changes, what opportunities, and what challenges may be in store for FY 82.

On behalf of AACPP and the Board of Directors, I want to extend a cordial welcome and express our appreciation for your interest and involvement.

Lloyd C. Ambler
