

TECHNICAL CHANGE ORDER

CertainTeedCertainTeed Corporation
Pipe and Plastics Group

APPLICABLE TO:

A/C Standard Product Specification

Spec. #1

DATE OF ISSUE:

JUN 11 1981

T.C.O. NO.1

27

PAGE NO.:

1

DESCRIPTION:Fluid-Tite A/C Pressure Pipe, Couplings and Accessories
Classes 100, 150 and 200 - FT-BPurpose:

To substitute a 2" threaded brass insert for the 2½" x 2" hexagonal bushed tapped coupling.

Background & Design Concept

Refer to major Spec. #3A, T.C.O. #24.

Effective Date:

Date of issue.

Disposition of Superseded Pages:

Destroy pages 11 and 12, May 26, 1978. Replace with attached page.

NOTE - There are no plans to go to the expense of providing an "A" length insert, which is the length needed for the 4" Couplings. As the 2½" x 2" bushing is being eliminated, there will be no 2" outlet available as a standard item for the 4" coupling. Orders for a 2" outlet are to be handled under the NSP procedure.

Effect on Inventories:

Finished items of the current design may be sold until the supply is exhausted.
