

AMERICAN SOCIETY OF  
HEATING, REFRIGERATING AND AIR-CONDITIONING ENGINEERS, INC.  
UNITED ENGINEERING CENTER, 345 E. 47TH STREET, NEW YORK, NEW YORK 10017

TO KEEP INFORMED,  
**HEATING  
REFRIGERATING  
AIR-CONDITIONING  
ENGINEERS**

**READ THE ASHRAE JOURNAL—**

21,000 engineers, contractors, sales executives, architects, scientists, educators and students can't be wrong. They all read the ASHRAE JOURNAL, official monthly publication of the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE).

**WHY THE JOURNAL?** In the fields of Heating, Refrigerating, Air Conditioning, Ventilating and allied sciences, there is only one authoritative publication... the ASHRAE JOURNAL. Kept throughout to timeliness and significance, the JOURNAL stands alone. Because of its unique position as official ASHRAE spokesman, the JOURNAL does not follow, but exercises a necessary leadership in its field, unhampered by business magazine restrictions.

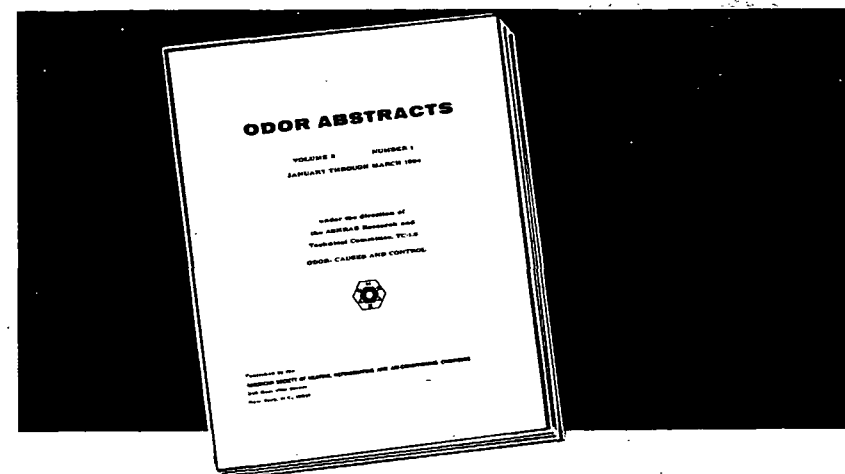

- The JOURNAL is edited to excel.
- There is no other single source of comparable knowledge in those areas of interest which the JOURNAL serves.

- new products
- new bulletins and catalogs
- news of regions, local chapters and their members
- applicants for admission
- committee plans and programs
- new books
- trends and changes in industry

For information on subscriptions and prices, consult the Reader Service Card in this volume of the ASHRAE GUIDE AND DATA BOOK.

**COMPLETE ENLIGHTENMENT IN JOURNAL READING.** It reports in breadth and depth on subjects of vital importance to industry and the general public. Without the KNOW-HOW represented by the cumulative research, product development, installation experience and standards work of the Society, there could not be the heating, refrigerating or air-conditioning accomplishments of today. The publication of this KNOW-HOW is the singular mission of the JOURNAL.

The editors have direct access to and exclusive use of all technical, conference and symposium papers presented at national meetings of the Society. Additionally, they seek out and publish thoughtful papers written by member and non-member experts on such dynamic topics as responsibilities of the engineer, developments in physiological knowledge, international relationships, better communications among engineers and the role of a society in improving engineering education.

**AVAILABLE FROM ASHRAE**

Abstracts of current articles dealing with odor control are now available to engineers, architects, chemists, designers and others working in this rapidly growing field. Information formerly obtainable only through long hours of library research can now be at your fingertips, quickly and economically.

Complete abstracts of 1962 and 1963 literature appear in bound volumes. For 1964, this abstracting service was published quarterly. During 1965, abstracts will also be available on a quarterly basis.

The abstracts are compiled by Arthur D. Little, Inc., under the auspices of the Technical Committee on Odor Causes and Control (TC 1.6) of the American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc.

Use the coupon below, or send your purchase order, for the bound volumes covering 1962 and 1963 as well as to enter your subscription to the 1964 and 1965 quarterly abstracts.

Libraries, research departments, consultants and individuals who are concerned with the problem of ventilation and odor control will find this abstract series indispensable. No other source offers such complete information from key publications around the world dealing with this topic.
