

1 there.

2 For general population with no occupational
3 exposure to asbestos, the risk would be 1.0.

4 The next one is kind of interesting, heating
5 trades; the risk was 4.4. And that includes when we
6 go back to the original paper, that included the
7 repair and installation of boilers and furnaces.

8 Q I see it goes through several more types of
9 occupations, and then you get down to general
10 population which is 1.0; and you indicated that is the
11 people with no occupational exposure. And then you
12 have got a column there that says garage.

13 What does that mean?

14 A The garage meaning the people working or
15 garage mechanics. And according to that study, the
16 risk was .9 which means it is very close to 1.0.

17 Q Okay. Before we move off of this study, I
18 would like to ask you just to explain to the jury how
19 it was that Dr. McDonald went about getting the cases
20 to include in this study?

21 A Basically he obtained all of the cases of
