SECTION I – INTRODUCTION**Site Entry and Purpose of the Inspection**

The Port of New Orleans and surrounding facilities were selected for inspection based on an Environmental Justice and Regional initiative to evaluate facilities at ports receiving or transporting Resource Conservation and Recovery Act (RCRA)-regulated hazardous wastes, and/or have an International Convention for the Prevention of Pollution from Ships (MARPOL) Annex V Certificate of Adequacy (COA) issued by the U.S. Coast Guard (USCG) .

This report is based on information supplied by the facility representatives, inspector observations, and records, including photographs taken (see Appendix 1), verbal or written statements made during or after the on-site inspection, and/or materials shown, demonstrated, or submitted to the EPA during or after the on-site inspection. In addition, information gathered prior to or after the inspection from a review of EPA, State, and public records may be included in this report.

Attendees

Facility General Description

Tenant/Area	Inspection Date	Process Description	Area of Concern
Belle Chasse Marine Transportation	07/15/24	Belle Chasse Marine Transportation Services (BCMT) is a tenant of Port of New Orleans and operates as a service station for vessel crews and pilots. BCMT transports pilots and crews to and from the vessels the pilots are working on while supplying food, spare parts, and other supplies the vessels may need. BCMT is covered under the Port of New Orleans' MARPOL COA.	Yes

SECTION II – OBSERVATIONS

Tenant: Belle Chasse Marine Transportation Services			
Section: 2.1	Date: 07/15/24, 11:00 AM	Contains AOC: Yes	Contains CBI: No
Lead Inspector: Vince Damiano	Attendees: Frank Hannan (Manager)		
BCMT is a tenant of Port of New Orleans and operates as a launch service station for vessel crews and pilots. BCMT transports pilots and crews to and from their vessels in addition to supplying food, spare parts, and other supplies the vessels may need. BCMT has three vessels in their fleet in this region they use for transportation. BCMT is covered under Port of New Orleans MARPOL COA, but Mr. Hannan stated BCMT has not landed any waste, used oil, or slops from vessels through their operations. BCMT is not registered with EPA because they do not generate or transport any RCRA-regulated waste. Mr. Hannan explained most of the waste generated on site is from maintenance of their vessels such as bilge water mixed with used oil or radiator coolant. Following the opening conference, the inspection team took a visual inspection of BCMT's yard space where drums and totes were stored. The inspection team first observed four 275-gallon totes and fifteen 55-gallon drums containing used oil or oily water, all ranging from ¼ full to completely full (see Appendix 1 – Photos 1 to 7). All 19 containers were unlabeled [AOC #1 - BCMT did not clearly label containers used to store used oil with the words "Used Oil" - 40 CFR 279.22(c)(1)]. Two of the drums, seen in Appendix 1 – Photos 2 and 5, appeared rusted and in poor condition [AOC #2: BCMT was storing used oil in containers that were in poor condition – 40 CFR 279.22(b)(1)]. Next, the inspection team moved to the storage area near BCMT's maintenance shop where the inspection team observed nine 275- to 300-gallon totes (see Appendix 1 – Photos 8 to 11). Three of the totes were empty, while the other six ranged from 1/3 full to completely full filled with material Mr. Hannan was not able to identify at the time of the inspection. One of the totes had a broken top (see Appendix 1 – Photo 11). Mr. Hannan stated most of the totes were products intended for transport out to a vessel, but the customer never picked them up. The inspection team also observed fourteen 55-gallon drums and one 5-gallon container next to the totes that were all full at the time of the inspection (see Appendix 1 – Photo 12 to 16). Mr. Hannan was unsure of the contents of the drums and totes but suspected some of them contained coolant or engine oil. The inspection team requested a waste determination on all containers observed [AOC #3 – BCMT did not make a hazardous waste determination. - 40 CFR 262.11]. Following the visual inspection, the inspection team conducted a closing conference at approximately 12:30 PM with BCMT personnel. The AOCs were communicated during the closing; however, further EPA review may change or add to their potential AOCs. Following the inspection, Mr. Hannan provided several emails responding to the AOCs found during the inspection (see Appendices 2, 3, and 4).			

SECTION III – RECORDS REVIEW

No RCRA-regulated records were reviewed during this focused onsite inspection.

SECTION IV – AREAS OF CONCERN

The presentation of Area(s) of Concern does not constitute a formal compliance determination or violation.

Tenant: Belle Chasse Marine Transportation Services		
AOC #1 – BCMT did not clearly label containers used to store used oil with the words “Used Oil”	Citation: 40 CFR 279.22(c)(1)	Section: 2.1
AOC #2 – BCMT was storing used oil in containers that were in poor condition	Citation: 40 CFR 279.22(b)(1)	Section: 2.1
AOC #3 – BCMT did not make a hazardous waste determination	Citation: 40 CFR 262.11	Section: 2.1

SECTION V – FOLLOW UP

Documents or files provided by the facility as follow-up were transmitted via email and included responses to AOCs or provision of documents requested. See Appendices 2 – 4.

Communication Log

During and after the inspection, additional information was emailed to EPA including:

1. 07/24/24 BCMT email – Frank Hannan provided the inspection team with manifests from their last used oil disposal, confirmation of no waste removal from vessels, and images of drums and totes labeled as used oil.
2. 07/24/24 BCMT email – Frank Hannan provided the inspection team with manifests and photos of some of the drums and totes sent for disposal.
3. 07/31/24 BCMT email – Frank Hannan provided the inspection team with manifests and photos of the rest of the drums and totes sent for disposal.

CAUTION: Don't open links or attachments unless you recognize the sender and know they are safe.

Vince ,

Per your visit on 7/15/24 you had our reply as follows per your concerns,

1. Shipping papers or related documents of the last 5 times garbage/waste were received from any vessel or ship.

(Per our meeting on that day, I had advised you from checking our log book on site that we at Alabo St. have not done such removal in the past three years. I believe the reason is that they have changed and made General Anchorage a Emergency anchorage only via USCG , and we mainly handle Pilot Changes only with occasionally stores to certain vessel along side of city docks with no garbage/waste sent ashore)

2. Confirmation of EPA RCRA ID number or generator status.

(We at Alabo St., to our knowledge have not generated any Hazmat Material to be disposed of. which was confirm to me by our vendor, Legacy Enviromental.)

- 3 .Any shipping papers or related documents from the last time used oil/bilge water was disposed of.

(These documents are included in said email in above attachment)

4. Pertaining to your concerns on the drums and totes in the front of our property . (All were taped off and label

with placard . Pictures in above attachment)

5. Hazard waste determination on 6 totes and the 14–55-gal drums next to our Maintenace shop .

(These also were taped off and placed a placard to label said totes and drums.)

Pertaining to removal of all drums, totes ,(empty or with liquid are in fact being set up for the first Pick up for disposal and any sampling that may be needed per Legacy is scheduled for the first truck to be here on site

For Friday 7/26/24. Wendy, our contact person at Legacy assured that what if any has to be sampled will be done and reported once

Test has been completed and I will forward said manifest soonest I receive them.

I hope that everything you will find in order, and per our phone call on Friday 7/19/24 I will take pictures and forward all manifest of all disposal per your findings

Addressed to you and my Corporate office as they come available.

If anything, else is required , feel free to email me at Frank@bcmt.com, and Rob@bcmt.com and I will address any other questions or Concerns you may have.

Respectfully
Frank Hannan
BCMT Alabo

Vince,

Good Afternoon,

In attachment is pictures along with the manifest for the beginning of disposal of used oily water/ bilge water

And empty drums that we have set up Thru Legacy Environmental.

The last Picture is of what we are waiting for Delivery of overpack drums to safely put drums that were a concern because of holes in them which cannot be transported unless placed in Overpacked drums.

The other tote you see, I am waiting on the proper MSDS sheets in order to be transported and tested So they can be disposed according to all regulations.

Once this is completed, I will forward all paperwork and to advise that all have been removed as directed.

If you need anything else please feel free to advise.

Respectfully

Frank Hannan III

Subject: 301 Alabo St. Wharf Belle Chasse Marine Transportation

CAUTION: Don't open links or attachments unless you recognize the sender and know they are safe.

Vince ,

Per your visit on 7/15/24 you had our reply as follows per your concerns,

1. Shipping papers or related documents of the last 5 times garbage/waste were received from any vessel or ship.

(Per our meeting on that day, I had advised you from checking our log book on site that we at Alabo St. have not done such removal

in the past three years. I believe the reason is that they have changed and made General Anchorage a Emergency anchorage only

via USCG , and we mainly handle Pilot Changes only with occasionally stores to certain vessel along side of city docks with no garbage/waste sent ashore)

2. Confirmation of EPA RCRA ID number or generator status.

(We at Alabo St., to our knowledge have not generated any Hazmat Material to be disposed of. which was confirm to me by our vendor, Legacy Enviromental.)

- 3 .Any shipping papers or related documents from the last time used oil/bilge water was disposed of.

(These documents are included in said email in above attachment)

4. Pertaining to your concerns on the drums and totes in the front of our property . (All were taped off and label

with placard . Pictures in above attachment)

5. Hazard waste determination on 6 totes and the 14–55-gal drums next to our Maintenance shop .

(These also were taped off and placed a placard to label said totes and drums.)

Pertaining to removal of all drums, totes ,(empty or with liquid are in fact being set up for the first Pick up for disposal and any sampling that may be needed per Legacy is scheduled for the first truck to be here on site

For Friday 7/26/24. Wendy, our contact person at Legacy assured that what if any has to be sampled will be done and reported once

Test has been completed and I will forward said manifest soonest I receive them.

I hope that everything you will find in order, and per our phone call on Friday 7/19/24 I will take pictures and forward all manifest of all disposal per your findings

Addressed to you and my Corporate office as they come available.

If anything, else is required , feel free to email me at Frank@bcmt.com, and Rob@bcmt.com and I will address any other questions or

Concerns you may have.

Respectfully

Frank Hannan

CAUTION: Don't open links or attachments unless you recognize the sender and know they are safe.

Vince/Frank

In above attachment , We have our final Manifest for the last of the Used oil that needed to Be disposed of via Legacy Enviromental.

I have also enclosed a picture of all totes, along with the 5 overpacked drums that we had to Place into overpack drums due to holes in the top of each drum that needed to be disposed of.

I can assure you that as of 1030 hrs today, July 31st 2024, that everything that you brought To our attention that had to be labeled and removed has been completed.

I hope that you find all in good order and if you have any questions or concerns to give me a call.

Please noted that from this day forward all drums and totes will be label according to your request.

Respectfully

Frank Hannan III
