

E. I. DU PONT DE NEMOURS & COMPANY

WILMINGTON, DELAWARE

EMPLOYEE RELATIONS DEPARTMENT

cc: J. S. Ousemer, Mgr., Safety and
Fire Protection Division
C. E. Marsh, Engineering Dept.

August 24, 1972

**DR. C. F. REINHARDT
ASSISTANT DIRECTOR
HASKELL LABORATORY**

ASBESTOS

Attached is a copy of the most recent revision of S4T. We have the following comments:

- 2.1 - should we add "...population, particularly among those who smoke."?
- 2.2h - Asbestos materials used in production of Company products.
- 3.3.2 - attempt (misspelled)
- 3.4.2.1 - dismantling (misspelled)
- Add after Section 6
- 6. MEDICAL EXAMINATIONS. - The preplacement, annual and termination medical examinations and records required for employees exposed to asbestos should be executed as outlined in OSHA 1910.93.
- Remember Section 6 to 7

Section 6.4 will need to be rewritten as a result of your findings on in-Company filter counting. When you have completed checking this out and reviewing the above comments, please contact J. S. Ousemer so we can meet with you and Dick Hubiak. It is desirable to have a distribution of this information to departmental OSHA coordinators as soon as possible. As discussed with you, timing makes it impractical to wait for S4T to be finalized.
