Dear Bob:

Replying to your letter of September 9, it was my understanding from our past correspondence that we were not going to do anything beyond our usual periodic examination and not even that if they were not due for it this year. However, if you do want blood counts and routine urine analyses on all of them, we will so arrange.

Please advise.

Sincerely yours,

L. E. CURTIS, M. D.

Dr. L. E. Curtis, Medical Director
Standard Oil Company of California
225 Bush Street
San Francisco 20, California

Dear Curt:

I found a series of examination records on my desk when I returned home, which came from you or members of your group. I have no information about them, and since my secretary, who received them, is away and left me no note or other word, I am at some loss concerning them. There are only a few and I presume that others will follow. What disturbs me somewhat, probably unnecessarily, is that they are not complete. For example, in some instances there is no information as to a second round of laboratory findings (blood picture and routine urinalysis).

I have only just returned from my vacation, and you may conclude that I am "trigger-happy" in mentioning these matters at this time, but it seems wise to get in this work as early as possible. It is important that we have the same kind of information that was provided on the initial records, so as to be able to make valid comparisons on a "before and after" basis. If there is any question about your doing the examinations in this manner, please let me know. If, on the other hand, these matters are all settled and being dealt with, no reply is necessary at this time.

With best regards.

Sincerely,

Robert A. Kehoe, M.D.
