AIR HYGIENE COMMITTEE REPORT

This Committee was activated in February 1946 -

Successive Chairmen - Mr. Ernest Muchleck, K & M
Mr. B. F. Stanton, J.M.
Mr. B. W. Luttenberger, R/M

The early meetings were devoted to an analysis of the dust problem in the various plants.

A letter requesting detailed information was sent to all members o the Institute. These reports were received and analyzed by the Co mittee. We found such a wide variance in methods of control, prot tice equipment used and the medical set-up, so that another approa was tried.

Each State Dept. of Health in which a Plant was located was contac on their facilities to aid members. We also contacted the various Insurance Carriers and the Industrial Hygiene Foundation of Mellon Institute for their advice and guidance in setting up a continuing program.

After considerable study it was determined that the various State Departments used different methods, equipment and processes in mak Plant Health Surveys and the results, particularly on dust counts, could not be properly correlated. The recommended Medical Set-up the results of diagnoses of chest x-rays also were ar variance.

It was the consensus of your committee that in order to have an tive program equally advantageous to all members in any state it would be necessary to have one (1) well established organization head up the program. Such organization to be staffed with quali engineers and medical men as well as the equipment and facilities analyze, correlate, and disseminate information.

By action of the Board of Directors your committee was authorized engage the services of the Industrial Hygiene Foundation of the Me Institute to make a preliminary survey of fourteen (14) member Plants and then present a program for future action.

This survey was made under the direction of Mr. W. C. L. Hemeon, H Engineer and Dr. Walmer of the Medical Staff.

An outline of Recommended Procedures is included in this report da June 1947. This report was submitted personally by and discussed the Institute meeting on June 17, 1948 by Mr. Hemeon.

By action of the members not sufficient votes were had to authorize proceeding with the proposed program.

Your committee feels that this is a worthy project with emphasis on the humanitarian side rather than for financial reasons and is will to become active if you so desire.

Yours very truly,

B. W. Luttenberger
