Dr. Robert E. Kehoe
Kettering Laboratory
Cincinnati, Ohio

Dear Dr. Kehoe:

Will you send me available literature on tetra ethyl lead as relating to its toxicity and possible absorption through the skin or orally.

Are there any known cases of lead poisoning where fumes of gasoline treated with tetra ethyl lead were shown to be cause of said lead poisoning?

I am interested in the case of a gasoline truck driver who claims lead poisoning from inhaling fumes of gasoline treated with tetra ethyl lead.

Dr. May R. Mayers has suggested that I write you in re this matter.

Thank you for your courtesy in this matter.

Sincerely,

R. M. Palmer
