

INDUSTRIAL ACOUSTICS COMPANY, INC.

341 Jackson Avenue • New York 54, N.Y.

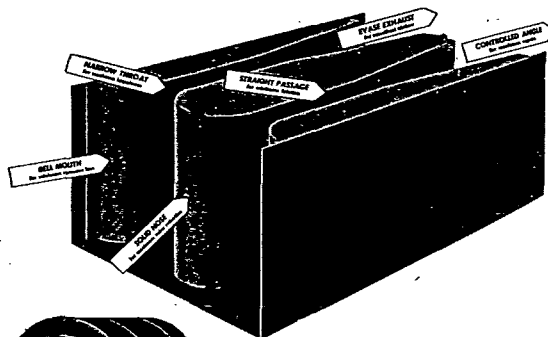

SPECIALISTS IN NOISE CONTROL

Manufacturers of Engineered Acoustical Products for Industry

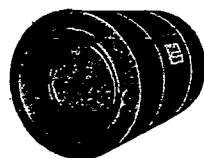

**For ALL air handling systems,
SPECIFY Quiet-DUCT Silencers with
these advanced design features
for:**

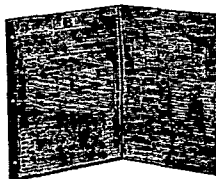

- MORE SILENCING
- LESS PRESSURE DROP
- LESS TURBULENCE
- LESS DIRT COLLECTION
- MAXIMUM PRESSURE
REGAIN

Quiet-DUCT Silencers
6 Standard Models 3' to 7'
long
23 Standard Basic Sizes
Unlimited Multiple Combina-
tions
Provides more NR (noise reduction)
than 20 to 100 feet of lined ductwork.

**CONIC-FLOW
Silencers**
1 Standard Model 3' to 10'
long
18 Standard Basic Sizes
Provides more NR (noise reduction)
than 20 to 200 feet of lined ductwork.

The "SHORT" FORM

For quickly and accurately re-
solving noise problems in any
air handling system in accord-
ance with data and procedures
as recommended in the GUIDE.

Quiet-VENT Silencers

6 Standard Models
3 Types

Provides conversational
privacy by preventing the
passage of noise in
either direction while
permitting the free cir-
culation of air.

INDUSTRIAL ENGINEERING AND EQUIPMENT COMPANY

INDEECO 22c Hanley Industrial Court, St. Louis 17, Mo.

Electric Blast Coil Space Heaters

TOTAL OR SUPPLEMENTARY HEAT • COMPLETE HEATING PACKAGES

SIZED TO SPECIFICATIONS:

Indeeco Blast Coil Heaters are complete, custom-built units sized to your specifications to save design and layout work and field time.

ADVANTAGES:

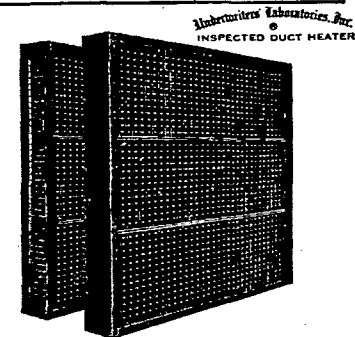

Unit is ready for simple field installation with all internal connections factory made. Custom-built to fit your particular wattage, dimensional and circuiting requirements. Available with built-in relays. Thermal cutout, furnished with heater, disconnects power in case of air failure.

EXAMPLES OF USES:

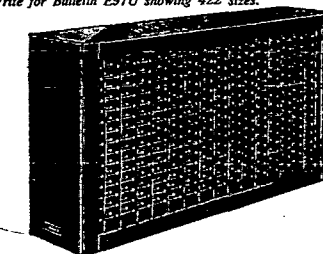

Commercial, industrial, institutional, residential and governmental installations heated by these patented units afford: (1) Primary source of heat (2) Booster, supplementary or standby auxiliary heating (3) Zone temperature control (4) Industrial applications. For example, for a major oil refinery, seven pumping stations without attendants are heated by INDEECO blast coil heaters.

64,250 INSTALLATIONS—

to date, covering more than 20,000 specifications in file. Typical jobs include more than 100 installations in Rockefeller Center, New York; St. Lawrence Seaway; General Foods Corporation, White Plains, and thousands of others.

Indeeco Units for Duct Installation. (Listed by Underwriters' Laboratories under label service.) Write for Bulletin E97U showing 422 sizes.

Indeeco Units for Package Air Conditioners. Write for Bulletin E97P, 704 sizes to fit 20 manufacturers' units.

WATER PREHEATERS

Space heating with electrically heated water is a recently popular development. Water is heated by INDEECO preheaters and then circulated through conventional hot water coils. Often this water is heated during off peak hours and stored for use as required. Preheaters ranging from 1000 watts to 210,000 watts are described in Bulletin E-50. The 195,000 watt preheater shown to the left is one of two such units being used for space heating in the offices of an eastern power company.
