mr. p.h. weaver.

i have learned in holland that the labor protection office in sweden has issued the following regulations regarding vcm and use of products containing vcm.

maximum concentration (twa, i believe) 20 ppm
maximum 15 minute exposure 50 ppm
employer to keep register with complete data of all
personnel exposed to 1 ppm (8 hr twa) or short time exposure of 5
ppm. personnel exposed to over 1 ppm must be informed by employer.
i thought someone there might want to be aware of this information.

c.r. flynn.
