C. ANTHONY D'ALONZO, M.D.
MEDICAL DIVISION
WILMINGTON, DELAWARE

In your recent letter, dated August 1, 1968, you requested a list of the names of employees who are exposed to asbestos.

The only use we have for asbestos in the Montague plant is in tubes of pipe insulation, which has to be sawed to fit. This causes a slight amount of asbestos dust.

The employee doing the sawing is, therefore, slightly exposed but so are all the other employees working in the immediate area. However, this exposure in any case must be considered very minor.

A list of men so exposed would, therefore, be a complete list of all persons employed in Maintenance and Engineering -- about 100 men. If you want this list, we will be very glad to send it to you.
