Huge thanks Chris -- I know the realities of your schedule (or at least, I can guess them).

Mark:

I am hoping to make it, but Izzy is the master of my schedule. I know that I head to Vienna or somewhere around then. If I cannot make it, I will try to get James there. He is superb. Best regards,

Chris

Chris, I of course 'second the emotion'.
 And if your dance card is too full, maybe Dep Sec Danly?
 (as you'll recall, he was an excellent guest at our Energy Future Forum last year ...)
 Best

Subject: Re: Help inviting Chris Wright to Yotta mainstage

Hi Chris,

It's been some months since we exchanged emails on your keynoting Yotta 2025. Reminder: Yotta is an event focused on the Intersection of digital infrastructure (AI) and energy I'm running in Las Vegas on Sept 8-10.

We have been liaising with Izzy to get Yotta onto your calendar. The speaking format would be an interview with [@Mark Mills](#) on the morning of the 10th September.

I understand that the responsibilities of your role in government can make it difficult to commit to such speaking engagements, so I understand if it's not doable. If necessary I would like you to consider sending someone else from your team.

I read your piece in the Economist last week with great interest and it's a crucial message to land with this audience.

I trust all is well with you,

George Rockett

Chris, we're extremely excited at the possibility of you speaking at the show.

Once there's more clarity around your schedule and we are closer to the event date, we can start planning other meeting opportunities with the most senior corporate executives in attendance - if that is something you'd find useful. We'll liaise with Izzy.

The news around AI and energy investment just gets bigger every day.

George

Chris, Izzy,
It's a great event - - even a huge one. Of course, I'm biased, because George has me on the Yotta Advisory Board (along with Brian). But, his big Vegas event is first class, huge audience, and an important one for team energy-reality to, as they say, "speak to truth." I'd be honored and delighted to have a fireside chat with you on that stage.
Best,
Mark

Hi Chris,

The conference program at [Yotta 2025](#) will be heavily focused on the intersection of AI and energy, bringing together the full digital infrastructure ecosystem including senior execs from most of the major hyperscale data center operators, AI factory builders and their various supply chains. You would make a compelling opening keynote speaker.

I believe that a mutual acquaintance of ours, [@Mark Mills](#), has already been in touch with you about the show which will take place on September 8-10th in Las Vegas. Should you be available to speak, I was hoping that Mark would be able to conduct the interview with you.

Hi Izzy,

Thank you for sending through the event information request form. I'll get this filled out and sent back to you ASAP. And I look forward to coordinating more with you in due course.

My very best regards to you both,

George

PS Thank you for the glowing introduction [@Brian Gitt](#)

Hi Chris,

Following up on our text exchange, I'd like to introduce you to George Rockett. He'd be thrilled to have you keynote the Yotta Conference this September. George is the founder of one of the most influential digital infrastructure media companies in the world, having shaped the data center industry for over 25 years through news, training, and events. His newest venture, Yotta, is focused on unifying the broader digital infrastructure ecosystem with a strong emphasis on innovation and sustainability. Details are below.

Talk soon,
Brian

Hi Brian,

Further to our call last week, I would like your help in making contact with Chris Wright at the DOE, and his team, with a view to getting him to keynote the mainstage at [Yotta 2025](#).

The event is scheduled for the 8-10th September, 2025 at the MGM Grand in Las Vegas.

This year's program continues to be heavily focused on the intersection of AI and Energy and we will be playing to an audience of 3,500 data center and energy professionals that will include many of the industry's most senior executives. Last year we had 134 digital infrastructure CEOs in the room and the C-Level accounted for more than 30% of our overall audience making the event a singularly important opportunity to connect with the leaders responsible for deploying \$100s billions into new US infrastructure.

Companies already participating include, AECOM, Constellation, Crusoe Energy, Digital Realty, DigitalBridge, Duke Energy, Equinix, Google, HP, KKR, Lambda Labs, Mckinsey, Meta, Microsoft, Nvidia, Oklo, OpenAI, Oracle, QTS, their customers and their technology supply chains.

My hope would be to have Mark P. Mills, a big supporter of the Yotta project, interview Chris Wright on the mainstage to kick-off the energy program scheduled for the 10th September.

Your help in making initial contact and acting as a reference for the event is appreciated.

Regards,

George
