VINYL CHLORIDE SURVEY RESULTS

<u>Sample No.</u>	<u>Sample Description</u>	<u>Sample Concentration mg/m³</u>
114 - 21	Employee #1 (Personal 08z)	* < 0.61
114 - 25	"	< 0.56
114 - 29	"	< 0.60
114 - 33	"	< 0.66
	8 hr.- Time Weighted Average	< 0.58
114 - 22	Area - Plastic Extruder Head	< 0.60
114 - 26	"	< 0.57
114 - 30	"	< 0.52
114 - 34	"	< 0.55
114 - 36	Ceiling Sample -	< 0.36
114 - 37	Ceiling Sample - Extruder Head	< 0.64

* Less than value designates no detectable level of vinyl chloride monomer measured.

The current Permissible Exposure Limits for Vinyl Chloride are 2.55 mg/mg (1 ppm) as an 8-hour time weighted average and 12.45 mg/m³ (5 ppm) as a 15 minute Ceiling Value. (Reference: Code of Federal Regulations, Title 29, Subpart Z, Section 1910.1017)
