DEPOSITION EXHIBIT
A.P.I #2
CASE # All Ms. Asbestos
DATE 11/14/81
CLERK D.M.L.

Attn:

Subj: O.S.H.A. Standards for Asbestos Dust

Gentlemen:

We are enclosing a copy of the recently established O.S.H.A. Standards on Asbestos Dust. As an insulation contractor, we are being asked many questions which we cannot answer about products containing Asbestos. For this reason we would like your comments regarding all phases of these standards and, in addition, we would like the following questions answered.

1. Which products in your product line, if any, contain Asbestos and the amount of Asbestos in them.

2. Under what conditions when using this product will the user be in compliance and under what conditions will the user not comply. If the product does not comply, what methods do you recommend for compliance.

3. What research have you done in monitoring and what system did you use.

4. What future plans do you have for products containing Asbestos or what substitutes can you recommend.

We would like an immediate reply for, as you know, this is law and all violations carry stiff penalties.

Very truly yours,

Robert Koth
Safety Director

RK/rs
