8(c) mtg on
TCDD in 2,4-DCP

Callie notices MCI's "blind spot" concerning Dayton lab (EASC) performance on dioxin/furan & nitroaromatics

Rousch says we should determine the reliability of the data. Agree.

Park asked Rousch, et al. to discuss what is an acceptable level for TCDD in 2,4-DCP.

Park/Rousch want to discuss worker exposure

Rousch seems comfortable with 5 ppb TCDD in 2,4-DCP
He & I are uncomfortable with 100 ppb. 10-50 ppb is questionable.

Park favors sending a letter to 2,4-DCP customers, stating what we know about TCDD isomers in 2,4-DCP.
