Dr. Robert A. Kehoe
Laboratory of Applied Physiology
College of Medicine
University of Cincinnati
Cincinnati, Ohio

Dear Dr. Kehoe:

In the letter which you sent me last June, you mentioned that you were preparing an article for publication describing the details of the dithizone method of analysis for lead. If this has been published I would appreciate a reprint. If not, could you send us the technique which you are now employing?

I wonder if the dithizone modified method which you are using has altered your opinion as to the normal blood levels. I am, of course, interested particularly in the younger age group.

Sincerely yours,

Kenneth D. Blackfan
