SUBJECT: Preparation of Objections to the Proposed Permanent VC Standard by OSHA, 1910.93c

By Thursday, May 23rd, please prepare a list of objections to the proposed permanent standards. Take each item under your group's activity, and object to any provision that:

1. Is impossible to do or is difficult to do.
2. Causes additional safety hazards.
3. Does not appear to be justified.
4. Increases operating costs.
5. Reduces the productivity of the plant or personnel.

URL 20342

Try to make some estimation of the amount of productivity lost or increase in cost.

Please submit these lists to me. These lists will be reviewed by Ben Leach and the Control Plan Group.

The composite of all the objections will be prepared and set to Naugatuck for incorporation into the presentation to OSHA.

We must have this information in their hands by June 1, 1974.
