duce the parts and get them to the customer on time. Wellman has *pioneered* in high-energy materials since the early thirties, working with original equipment manufacturers to meet their specific design requirements. Branch warehouses in eight major cities service more than 2,500 Wellman wholesaler outlets throughout the United States.

Whatever the application for smooth control of power, Wellman offers a *friction* product designed to meet the exact needs of the design engineer.

Sintered metallic brake and clutch discs.

Heavy-duty sintered metallic disc for mining machine.

Farm machinery provides many friction product applications.

Dynamometer testing of friction products.
