SEARCH ON CONCRETE LITERATURE

The following literature was searched for references to harmful dusts, particularly asbestos:

Journal of the American Concrete Institute 1939-1959

Mainly technical articles with no reference to asbestos disease

Modern Concrete 1966-1973

Also, nothing here

Miscellaneous books at the UC Berkeley Engineering Library

Again, nothing

Concrete 1939-Jan 1961

Several articles on harmful dusts, including some on asbestos. All enclosed. Permanente Cement mentioned in news items.

Pit & Quarry July 1948-June 1950

One article on discussing workman's compensation and mentioning asbestosis. Enclosed. Permanente Cement mentioned in a news item in this issue.

Further possible research:

SF Public Library has *Rock Products* from 1924 to 1963. It may have to be ordered from storage. This journal mentioned asbestos disease in a 1932 article.

San Jose State University has most of the volumes of *Pit & Quarry* from 1940-1947. From looking at this journal in 1938 and the late 1940s, I think there is a good chance other helpful articles would show up during the 1940s.
