

May 28, 1942.

Mr. L. B. F. Raycroft,
Public and Industrial Relations,
The Electric Storage Battery Company,
Allegheny Avenue and 19th Street,
Philadelphia, Pennsylvania.

Dear Mr. Raycroft:

Pursuant to our conversation of some days ago, I am sending you the questionnaires, as we have tentatively drawn them up for your examination and critical comment. I expect to get the expert advice of a statistician, a colleague of mine, before we attempt to draw up the final forms. I may ask one or two other man for their advice. However, I think you are in the position to tell me how well this fits in with your present ideas, and also with your knowledge of the information which can be obtained.

There is one additional point which might be raised, in that the information we have requested concerning the use of raw material and the quantity of production may not be obtainable without governmental consent. You will know whether or not this is the case, and will be able to advise me accordingly.

Please accept my thanks for the copy of the report of the Industrial Hygiene Sessions. My own copy of this has apparently disappeared, and I am glad I shall be able to keep the one you sent me.

Very truly yours,

Robert A. Kehoe, M. D.
