What is the status of the questions concerning order quantities on Santicizer 335 and Aroclor 6070 - 10% Xylene. Could you give me an up-date on your latest conversations on this subject.

Status?

Willis

~~Willis~~

Joe Sebach (Purchasing Coordinator for A-1854) has agreed to give us a quarterly volume projection for S-335 in lieu of a 15 drum minimum order.

He will contact me as soon as the remaining A-1854 ~~volume~~ inventory runs out and will place their first orders for S-335.

We will order A-6070 on a spot basis since you said no minimum order size is necessary because Monsanto will have inventory at Anniston.
