Subject: Meeting with Bendix personnel re asbestos from brakes

Bendix Corporation has a contract with EPA to measure emissions of asbestos from brakes. Mr. M. G. Jacko, of Bendix, found out from Mr. W. Bergman of a Product Development group that we are doing similar work, and contacted us by phone, requesting a meeting to exchange ideas on measurement techniques.

After giving hell to Mr. Bergman and his manager for disclosing such information without our or your approval, I referred this request to Mr. Marande, who obtained Mr. Jensen's OK to proceed with this exchange of information. The intent would be to discuss test procedures only, and not results.

Preliminary to meeting with Mr. Jacko, we requested that they sign our standard Confidential Disclosure Waiver. They complied, but requested that we sign their equivalent form, here enclosed, which is much longer and complicated, and seems a little out of place in the present context.

I would be grateful for your advice on how to proceed.
