ENVIRONMENTAL HEALTH PERSPECTIVES

Volume 49, March 1983

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES
Public Health Service
National Institutes of Health

David P. Rall, Director,
National Institute of Environmental Health Sciences

EDITORS

George W. Lucier

Gary E. R. Hook

BOARD OF EDITORS

John R. Bend
Colin F. Chignell
Robert L. Dixon
Hans L. Falk
Robert A. Goyer
Larry G. Hart

Joseph K. Haseman
David G. Hoel
James E. Huff
Burke Judd
Heinrich V. Malling
H. B. Matthews
Ernest E. McConnell

CONTENTS

Second International Conference on Carcinogenic and Mutagenic *N*-Substituted Aryl Compounds

F. F. Kadlubar and F. A. Beland. Preface	1
J. A. Miller and E. C. Miller. Some historical aspects of <i>N</i> -aryl carcinogens and their metabolic activation	3
R. A. Cartwright. Historical and modern epidemiological studies on populations exposed to <i>N</i> -substituted aryl compounds	13
R. Kato, T. Kamataki and Y. Yamazoe. <i>N</i> -Hydroxylation of carcinogenic and mutagenic aromatic amines	21
G. J. Mulder and J. H. N. Meerman. Sulfation and glucuronidation as competing pathways in the metabolism of hydroxamic acids: the role on <i>N,O</i> -sulfonation in chemical carcinogenesis of aromatic amines	27
T. V. Zenser, S. M. Cohen, M. B. Mattammal, R. W. Wise, N. S. Napp and B. B. Davis. Prostaglandin hydroperoxidase-catalyzed activation of certain <i>N</i> -substituted aryl renal and bladder carcinogens	33
C. M. King, and I. B. Glowinski. Acetylation, deacetylation and acyltransfer	43
H.-G. Neumann. Role of tissue exposure and DNA lesions for organ-specific effects of carcinogenic <i>trans</i> -4-acetylaminostilbene in rats.	51
B. Ketterer, B. Coles and D. J. Meyer. The role of glutathione in detoxication	56
J. A. Hinson. Reactive metabolites of phenacetin and acetaminophen: a review	71
J. D. Scribner, B. Woodworth, G. Koponen and E. H. Holmes. Use of 2-acetamidophenanthrene and 2-acetamidofluorene in investigations of mechanisms of hepatocarcinogenesis	81
J. G. Westra, A. Visser and A. Tulp. Binding and repair of 2-acetylaminofluorene adducts in distinct liver cell populations	87
M. C. Poirier, B'A. True and B. A. Laishes. Determination of 2-acetylaminofluorene adducts by immunoassay	93
C. N. Martin, F. A. Beland, J. C. Kennelly and F. F. Kadlubar. Binding of benzidine, <i>N</i> -acetylbenzidine, <i>N,N'</i> -diacetylbenzidine and Direct Blue 6 to rat liver DNA.	101
R. M. Santella, and D. Grunberger. Induction of the base displacement or Z conformation in DNA by <i>N</i> -2-acetylaminofluorene modification.	107
P. Rio, B. Malfoy, E. Sage and M. Leng. Conformation of oligonucleotides and nucleic acids modified with 2-aminofluorene or 2-acetylaminofluorene	117
F. A. Beland, D. T. Beranek, K. L. Dooley, R. H. Heflich and F. F. Kadlubar. Arylamine-DNA adducts <i>in vitro</i> and <i>in vivo</i> : their role in bacterial mutagenesis and urinary bladder carcinogenesis	125
R. P. P. Fuchs, N. Schwartz and M. P. Daune. Analysis at the sequence level of mutations induced by the ultimate carcinogen <i>N</i> -acetoxy- <i>N</i> -2-acetylaminofluorene	135
S. S. Thorgeirsson, L. C. Erickson, C. L. Smith and I. B. Glowinski. Genotoxicity of <i>N</i> -acetylarylamines in the Salmonella/hepatocyte system	141

L. Oglesby, C. Hix-Baker, P. MacNair, M. Sieg, L. Snow and R. Langenbach. Activation of aromatic amines to mutagens by bovine bladder and liver cells	147
J. A. Swenberg, D. E. Rickert, B. L. Baranyi and J. I. Goodman. Cell specificity in DNA binding and repair of chemical carcinogens	155
S. C. Strom, R. L. Jirtle and G. Michalopoulos. Genotoxic effects of 2-acetylaminofluorene on rat and human hepatocytes.	165
L. Eriksson, M. Ahluwalia, J. Spiewak, G. Lee, D. S. R. Sarma, M. J. Roomi and E. Farber. Distinctive biochemical pattern associated with resistance of hepatocytes in hepatocyte nodules during liver carcinogenesis	171
D. Malejka-Giganti, C. L. Ritter and C. N. Ryzewski. Pathobiologic and metabolic aspects of mammary gland tumorigenesis by <i>N</i> -substituted aryl compounds	175
J. Russo, L. K. Tay, D. R. Ciocca and I. H. Russo. Molecular and cellular basis of the mammary gland susceptibility to carcinogenesis	185
G. T. Bryan. Pathogenesis of human urinary bladder cancer	201
S. M. Cohen, R. E. Greenfield and L. B. Ellwein. Multistage carcinogenesis in the urinary bladder.	209
M. Ito, S. Fukushima, T. Shirai, N. Nakanishi, R. Hasegawa and K. Imaida. Modifying factors in urinary bladder carcinogenesis	217
M. Nussbaum, E. S. Fiala, B. Kulkarni, K. El-Bayoumy and J. H. Weisburger. <i>In vivo</i> metabolism of 3,2'-dimethyl-4-aminobiphenyl (DMAB) bearing on its organotropism in the Syrian golden hamster and the F344 rat	223
Abstracts	233
Contributed Article	
H. Babich and G. Stotzky. Developing standards for environmental toxicants: the need to consider abiotic environmental factors and microbe-mediated ecologic processes	247
Published Volumes of EHP	261
Instructions to Authors	263
