SUBJECT: LEAD REMOVAL
SPRED VELVET -- 860 LINE

Since Chicago and St. Louis are continuing to manufacture Y-2750, Y-2718 and Y-2787 they have asked that these formulas be made lead-free and reinstated as part of the Velvet deep color line. We are issuing the following formulas:

Spred Velvet White -- 860-W-30110
Spred Velvet Pastel Tint Base -- 860-W-30112
Spred Velvet Intermediate Tint Base -- 860-W-30114

The same cobalt zirconium drier system is being used as in the remainder of the line. These formulas will be sent to Chicago #17 and St. Louis.

J. E. Southwick
