DESCRIPTION

Protective Caplugs for Threaded Brass Inserts

1.0 General

This purchasing specification states the requirements for material, dimensions, and workmanship requirements for caplugs used in threaded brass inserts.

2.0 Use

The caplugs prevent epoxy bonding agent from entering the inside threads of the inserts when the inserts are being fastened inside the holes drilled into the A/C. Caplugs also prevent dirt, grit etc. from entering the inserts during storage and shipment. A further aid is color coding to identify the inserts -- all AWWA inserts will have yellow caplugs and all NPT inserts will have red caplugs.

3.0 Material

Caplugs shall be made from a high density polyethylene and meet the requirements of Allied Chemicals molding grade SS 50-035, or equivalent.

4.0 Conformance

Caplugs for 3/4" and 1" AWWA and 1-1/2" NPT shall conform to the dimensions shown in Figures I and II of this specification. 3/4" and 1" NPT caplugs shall be standard commercial purchases.

5.0 Packaging

The caplugs shall be packaged such that each package will contain only one size and type. The package shall be clearly marked as to its contents.

DESCRIPTION:

Protective Caplugs for Threaded Brass Inserts

6.0 Marking

Sizes 3/4" and 1" AWWA and 1-1/2" NPT shall be shown on the caplug along with CPC. Sizes 3/4" and 1" NPT are standard commercial items and as such are not marked.

7.0 Special

The 2" NPT inserts will use the present caplug and it is to be red in color. It shall be in accordance with the dimensions as shown in Table A and Figure III.

8.0 Inspection

The criteria for inspection is that the caplugs perform functionally in service. This is the only inspection necessary.
