RE: ASBESTOS PAPER, CLOTH AND BOARD

Today I went to the Storeroom to remove labels from the asbestos paper, cloth and board we have in stock.

Enclosed are labels and cautions found. Upon careful examination, we found the caution on the board.

We will make some individual tests as soon as the sampler arrive. Due to the material used, how it is used and exposure, I don't anticipate a problem but should have the data to back up.

R. W. KNAPP

Enc.

P.S. I received usage figures for the year 1974 and they are available if you are interested.
