Introduced Messrs Gaze and Dougherty to management personnel. Certainteed is losing Blue supply from T/N in 1977. Presently purchasing Blue ML6 from Central, but will wish additional tonnage in 77 from Cape.

Gaze agreed to supply 100 metric tons of Blue and 100 metric tons of Amosite for test, but advised it would not be possible to supply Blue fibre to them for at least five years. He did agree, however, that they would be a continuous source of supply for Amosite.

Their test of Amosite grades are incomplete/when complete they will place order for Amosite - a grade of their choice - and Blue S.
