SUBJECT: PURCHASE SPECIFICATIONS - Miscellaneous
re: Status of Celotex Approvals

Pursuant to my letter of May 13 on the above subject, in a discussion today with Lloyd Letourneau it was agreed the following action would be taken:

<u>P.S.#</u>	<u>MATERIALS</u>	<u>ACTION</u>
050	ASBESTOPRENE 233 Facing	Lloyd will send latest spec (12/05/74) to Celotex for review and approval.
067	ASBESTOPAC 232	Lloyd will send latest spec (10/16/74) to Celotex for review and approval.
108	Commercial Asbestos Paper - Starch Binder	Celotex to be continued as approved source; no action required.
222	ASBESTOPRENE 233 Packing	Lloyd will send latest spec (12/05/74) to Celotex for review and approval.
564	Treated Asbestos Paper	Lloyd will send latest spec (9/06/73) to Celotex to determine if they will accept it so that we may eliminate Temporary Edition of 2/27/73.
597	Low Binder Treated Asbestos Paper	It is believed Celotex is still not interested in this item; Lloyd will confirm with them.
856	Treated Asbestos Paper Super Black	Material is no longer being purchased; I will cancel specification.
946	ASBESTOPAC 958 Facing Celotex 6506	Lloyd will send current P. S. #506 (4/29/74) for Celotex's review, as it contains the latest and most desirable physical properties for red facing, rather than one of the older P.S.#946 finalized or tentative editions.
