Dear Susan:

Recoding of death certificates by Susie is finished. The changes we have to make in the final report are as follows:

One additional observed death to category 800 (All External Causes of Death) which was formerly a missing death certificate.

One additional observed death to category 390 (All Diseases of the Circulatory System) which was formerly coded as symptoms, senility, and ill defined conditions.

Other changes which should be documented in the final printouts but have no bearing on the final report are as follows:

One less death for total residual
One more death for cause 801 (accidents)
One less death for cause 799 (symptoms, senility and ill defined conditions)
One more death for cause 410 (ASHD including CHD)

Rob
