Re: Asbestos Removal

As we discussed today, I'm sending you a copy a Specification covering Asbestos Removal work which was carried out in the Alcoa Bldg. Note that the governing body for the air-pollution regulations here is Allegheny County. You will have different regulations which to follow.

The contractor that satisfactorily carried out this work, as well as a previous, larger job, in the Alcoa Bldg. was Samtek, Inc., 112 Kountz Rd., Freeport, PA.

Allegheny County requires that air-monitoring, etc. be carried out by an independent consultant. The consultant that we used for this work as well as for other jobs both in the Alcoa Bldg. and at Lancaster was ACM Compliance, PO Box 7873, Pgh. PA.
