GUEST SOLOIST IS FEATURED AT 'HOUR OF MUSIC'

A program said to be of unusual classic and operatic interest was presented at the Saturday afternoon "Hour of Music" recital of the Theatre Music company. The inspiration of the program was delightfully carried out by the guest soloist, Mrs. Janet Drake Stanley whose coloratura was heard in a group of three songs chosen both in keeping with the theme and for the bringing out of the birdlike purity and interpretive ability of the singer. The first was the Del Acqua "Chanson Provencal" an elaborate coloratura composition in which the unusual range of the voice in presentation of the trills and embellishments of this difficult number was well brought out. So popular was this song with the audience that the artist was interrupted two or three times during its rendition, with bursts of applause.

Cyril Scott's "Lotus Bird song" was a dreamy lyric song with finish and style, as was the brilliant Gounod "Waltz" from Romeo and Juliet. In response to encore Mrs. Stanley sang the popular "Cuckoo Clock" of Schutte.

Madame Edith Virden-Smith at the piano added to the enjoyment of this group of solos.

The program opened with the ...ne-piano ...ecture from "The Flying ...utchman" the first of the great ...operas to ...ave been ...ritten by Richard ...agner. PREPARE TO SINK VALLEY OIL WELL

Prospect to Start Near Old Site Northwest of Brawley on Geologist's Advice.

BRAWLEY May 20 (Special)—Announcement has been made by officials of the Imperial Valley Petroleum corporation, which plans to prospect for oil in the district northwest of Brawley that an agreement has been made with a Los Angeles oil company to furnish the corporation with fuel oil necessary for drilling purposes.

This is the first step taken by the new corporation toward resuming operations for oil in the section near the site of the old Brawley well which was drilled at a cost of $200,000 and in which indications of oil and gas were found.

Geologists who have examined the structure of this district claim that it has all of the indications of an oil bearing territory and the operations of the new corporation are based upon advice of geologists and prospectors who have gone over the district during the last few years.

Six presidents of the United States have been children.
