AROCLOR WILDLIFE EXPENSES

R. E. Keller JFQ
E. S. Tucker JFQ
M. P. Wheeler EWHEE

F. Fluids research paid $75,000 toward our $100,000 commitment to Industrial Bio-Test Labs. Plasticizers agreed to pick up $50,000 this year. Will you please see that the lab analytical charges fall on the plasticizer group so that they pick up at least $50,000.

Elmer, if this project is getting out of hand $-wise at Industrial Bio-Test, we had better consider cutting the number of Aroclors to be tested. For example, Aroclor 1260 has a very low production.

Please call when you return from vacation.

W. R. Richard
