Mr. Elmer P. Wheeler
Industrial Hygienist
Monsanto Chemical Co.
1700 S. Second Street
St. Louis 4, Missouri

Dear Elmer:

Yesterday afternoon Ralph Atchley and I planned the design of the experiments on Pydraul F-150 (cf your letter of June 27, 1956), so that he can get started on it when his vacation is terminated on July 22, 1956.

The enclosed sheets give an idea of our proposed attack on the analytical method. Time does not permit me to elaborate on the rest of the design and procedures.

You might send us a gallon of Aroclor 1242, since we have none in stock.

In case you wish to contact me for any reason, don't hesitate. I shall be at The Sheldrake, 3030 Bayshore Drive, Ft. Lauderdale, Florida from July 11 to July 23. I expect to be back here on July 30.

Sincerely yours,

Joseph F. Treon

Enclosure

P.S. I promised to send you the reference for the determination of vapor pressures in the range of 10^{-5} to 10^{-7} mm. The reference is Balson, Trans. Faraday Soc. 43:54, (1947).
