ASBESTOS CONFERENCE
May 6 and 7, 1970

Attached herewith is the program for the Company-wide conference that was proposed in my letter of February 2, 1970 to all liaison personnel.

To date we have had indications that about fifty-six persons will attend. The sessions will be held at the Du Pont Country Club. It is expected that the total cost of holding this conference, exclusive of attendees' travel expenses, when distributed on a per capita basis, will amount to ten to twenty dollars per person. I should receive in advance of the meeting a general ledger account with appropriate sub-accounts to cover the per capita cost for each person who expects to attend.

Additional information regarding exact locations and times and more about the format of the second day's session will be forthcoming shortly.

PROPOSED AGENDA

Part A

The types of asbestos minerals.
Mineralogy, sources, uses, quantities used.

History and description of diseases produced by the inhalation of asbestos.

The incidence of asbestos diseases and distribution of cases.

The measurement of asbestos fibers and particles in the air of work places.

Acceptable concentrations of asbestos in the air in work places.

Part B

Panel Discussion

1. The occurrence and use of asbestos and asbestos products in Du Pont operations.

2. Should there be a standardized method of collecting and evaluating air samples for asbestos concentrations? If so, what is the method of choice?

3. What should be regarded as acceptable concentrations of asbestos in the air in Du Pont work places?

4. Medical studies to correlate environmental conditions with the health experience of Du Pont workers.
