INTRA-COMPANY COMMUNICATION

SUBJECT Asbestos

DATE January 23, 1981

TO J. Zeitz

cc: D. Reda
L. Winchester
J. Lunsford
E. Boothman
J. Buescher
C. Ulfig

FROM G. Austin

As you are aware, we have made every effort to contain the areas in this facility utilizing asbestos. I pointed out at the last Manufacturing Engineering meeting that certain Victor numbers containing asbestos would be run on the first floor due to the part size and/or equipment required to produce the product.

The following numbers fall into this class. I would appreciate you having these items reviewed with the idea of substituting a nonasbestos filler for the asbestos currently used.

Victor number -- 1998 & M
3926 & M
3825 & M
3929 & M
3288 & M

If no suitable alternate can be assigned, consideration should be given to dropping these items from our line.

Your earliest reply would be appreciated.

Gary Austin
