MONSANTO CHEMICAL COMPANY

From : St. Louis - General Offices

cc: O. deGarmo - JFQ PLANT
R. S. Wobus - RWOBU

DATE : January 16, 1964

SUBJECT : ASHLAND OIL
BIPHENYL

REFERENCE :

TO : JFQ PLANT
E. M. Emery

Under separate cover, Mr. Dolin has sent you a sample of Ashland Oil biphenyl for determination of purity and impurities. The Anniston lab was only able to analyze this sample for the following properties:

	Result	Typical
Crystallizing Point °C.	57.5	68.8
Appearance	Light Brown	White
Odor	Naphthalene	None

Will you please let us know when you will have this information.
