Status Codes: S - Scheduled to take I - Incomplete C - Complete

Each month JFC will give me this report + I will copy both of you. All 14 classes are required annually. The three of us are required to take #4, 5 + 10. The topics will alternate monthly from the various computer stations. For example one month topics 1-7 will be available, the following month topics 8-14 will be available at any ^{particular} station. The code will change to "incomplete" or "complete" as you participate (if you start a topic + log out it will reflect "incomplete" until you log back on and "complete" the topic.) The computer electronically monitors the progress. Training on the "hands on" instructions is offered as posted on the BB for Set + ~~Month~~.
