RESEARCH AND DEVELOPMENT

18 December 1987

MEMORANDUM

SUBJECT: Review of "A Cancer Risk-Specific Dose Estimate For
2,3,7,8-TCDD".

FROM: G. L. Kimmel, PhD
Developmental Toxicologist

THRU: W. H. Farland, PhD
Acting Director, REAG

TO: P. W. Preuss, PhD
Director, ORSSA

I have examined the document, especially as it relates to the inclusion of information on reproduction and development. I believe the section on reproduction and development fits much better than it has in previous drafts.

One correction that should be made regards the RfD. The RfD that was developed in my issue paper was 1×10^{-5} ug/kg/day. This translates into 10 pg/kg/day, not 1 pg/kg/day.
