

Shell Oil Company
Interoffice Memorandum

JANUARY 19, 1982

FROM: D. S. McCRAW
TO: J. G. SIMPSON, M.D.
SUBJECT: VCM-EPI EVIDENCE

This is a response to your query about a VCM epidemiology review.

During the third quarter, 1980 I reviewed, per R. E. Joyner's request, four major VCM mortality studies to select the exact SMR reported in each study for cancer sites. I compiled a table for Dr. Joyner. Unfortunately I did not retain a copy of the table. This was neither an exhaustive review nor a critical review. The project did not involve extracting any morbidity data from the Health Surveillance System.

I have one other connection with VCM epidemiology. I have been assigned to represent Shell on a CMA Task Force to overview a VCM epidemiology study. This project has not yet begun.
