Commissioner:

It was great to meet you yesterday. Troy and I appreciate your willingness to engage on the power generation issues that are important to our Country. I found your comments educational. We have reached out to Paul Walker to discuss how to make sure the various PUC's are heard as a significant stakeholders in these issues affecting power generation and the environment as well as your home state of Utah.

I also hope your group will take us up on the offer to meet the Administrator at his office in Washington DC. You will find that the venue will be much more conducive to a meaningful dialogue free from distractions.
