Dear Ms [REDACTED],

Thank you for taking the time to speak with us and for the great discussion with you and your colleagues on 22.05.2023.

As discussed, I am attaching the presentation from our call with our specific areas of the F-Gas Regulation where our industry and Johnson Controls see a need for a more differentiated approach when it comes to definitions and applications of the prohibition.

Please feel free to get back to me if you have further questions.

As mentioned in our call, Ms [REDACTED], Johnson Controls' [REDACTED] and [REDACTED] will be traveling from the USA to Brussels on 28 - 29 June. Would you, or even Commissioner Simson, be available for an in person meeting with her to further discuss the sectors' needs and about the planned Heat Pump Action Plan of the EU Commission? That would be very appreciated.

We look forward to your positive answer and please don't hesitate to get back to us in case of further questions.

With kind regards

[REDACTED]
