●

FEBRUARY, 1952

Federation of Paint and Varnish Production Clubs

(Printed in U.S.A.)

DUP030044189

The Publications Committee of the Federation of Paint and Varnish Production Clubs has reviewed the technical information published in the *Official* DIGEST during the years 1948 thru 1951, and has prepared this Quadrennial Index.

For convenience, the material has been classified with respect to subject matter and authorship, with separate sections for Club papers, the Open Forum, and the Joseph J. Mattiello Lectures.

PUBLICATIONS COMMITTEE

SUBJECT INDEX

ADMINISTRATION AND ORGANIZATION

GENERAL

Chemical Literature in the Paint, Varnish, and Lacquer Industry—F. S. Boig, May, 1948, p. 412.
Chemical Markets as They Affect the Paint Industry—E. M. Fisher, Apr., 1948, p. 333.
Commentary on Industrial Research—A Minich, Aug., 1948, p. 619.
Industrial Research Organization—J. S. Gourlay, Feb., 1951, p. 97.
Organization—H. E. Miles, May, 1950, p. 369.
Paint Laboratory Organization and Administration. Small and Medium Size Laboratories—R. Fuller, Dec., 1949, p. 899.
Small Order Manufacture: Formulation—D. E. Callis, Dec., 1950, p. 1130.
Small Order Manufacture: Management's Viewpoint—J. B. Heymes, Dec., 1950, p. 1141.
Small Order Manufacture: Product Control—J. P. Cornell, Dec., 1950, p. 1133.
Small Order Manufacture: Production—A. H. Cramer, Dec., 1950, p. 1132.
Small Order Manufacture: Why Small Orders? The Sales Viewpoint—J. S. Coughlin, Dec., 1950, p. 1126.
Teamwork: Sales, Production, and Technical—H. H. Hopkins, Dec., 1949, p. 894.

COST ACCOUNTING

Small Order Manufacture: Cost Accounting—C. H. Sondhaus, Dec., 1950, p. 1136.

PLANT DESIGN

Astral Celluco Plant at Montataire—J. S. Long, Jan., 1950, p. 69.

SAFETY AND HEALTH

Fire and Toxic Gas Hazards of Paint Films—M. W. Westgate—Apr., 1948, p. 309.
Respiratory Protection in the Paint and Varnish Industry—H. J. Segrave, Feb., 1950, p. 130.
Safety and Hazards in Handling Solvents in Paint and Varnish Plants—A. C. Belyea, Feb., 1950, p. 136.
Safety Color Code Helps in Preventing Personal Injuries—H. L. Miner, Feb., 1950, p. 141.
Safety in Lacquer Manufacture—C. L. Jones, Feb., 1950, p. 145.
Safety Precautions in Handling Industrial Solvents—F. A. Horsley, July, 1951, p. 441.
Toxicity of Solvents—W. A. Cook and L. E. Gordan, Feb., 1950, p. 124.
Ventilation, Fume, and Dust Control in the Paint Industry—A. J. Kleissler, Feb., 1950, p. 133.

FORMULATION

ALUMINUM COATINGS

Formulation of Aluminum Paint Vehicles—R. I. Wray, Aug., 1949, p. 519.
New Developments in Aluminum Paint Vehicle Formulation—R. I. Wray, Aug., 1951, p. 492.

ENAMELS

Effect of Zinc Oxide on Architectural White Alkyd Enamels—Western New York Club, Nov., 1950, p. 806.

DUP030044191

Evaluation of Body Varnishes in Gloss Enamels—Golden Gate Club, Nov., 1950, p. 842.
Formulation of Copper Phthalocyanine Finishes—E. C. Botti, June, 1950, p. 408.
Formulation of Industrial Finishes (Metal)—M. A. Glaser, June, 1950, p. 418.
Pigmentation of Durable Colored Exterior Enamel—A. E. Kromer and E. C. Botti, Oct., 1948, p. 760.
Pigments-Dispersion and Pigmented Products for Lacquers and Enamels—J. Crouet, Dec., 1948, p. 951.
Silicone White Baking Enamels—Chicago Club, Nov., 1948, p. 876.
Two Years of Styrenated Alkyd Resins for Surface Coatings—W. H. Patrick and E. H. Trussell, Oct., 1950, p. 767.

HOUSE PAINTS

1949 AZO Survey of Commercial Outside White House Paints—L. P. Larson, J. H. Calbeck, and P. H. Dennison, Sept., 1950, p. 649.
Coating Resins Based on Styrene—K. V. McCullough, Aug., 1950, p. 585.
Co-Fumed Leaded Zinc Oxide in House Paints—C. H. Adams, June, 1950, p. 444.
Current House Paints—W. G. Vannoy, May, 1949, p. 235.
Emulsion Paints From a Butadiene-Styrene Emulsion Copolymer—L. L. Ryden, N. G. Britt, and R. D. Visger, Apr., 1950, p. 292.
Exterior House Paint—S. Werthan, June, 1949, p. 311.
Formulation Fundamentals of Trade Sales Finishes—S. Werthan, Mar., 1950, p. 182.
Four Years' Results of Exterior House Paint Test Program—S. Werthan, Mar., 1948, p. 279.
House Paint Progress in the United States of America—W. G. Vannoy and J. F. Broeker, May, 1948, p. 368.
Lead Pigments and Paints—A. Stewart, Dec., 1950, p. 1100.
Mildew Inhibitors for House Paints—W. G. Vannoy, Feb., 1948, p. 163.
Pigment Volume Concentration in White House Paints in Oil-Conserving and Pre-War Vehicles: I—Montreal Club, Jan., 1948, p. 138.
Pigment Volume Concentration in White House Paints in Oil-Conserving and Pre-War Vehicles: II—Montreal Club, Nov., 1948, p. 844.
Pigment Volume Concentration in White House Paints in Oil-Conserving and Pre-War Vehicles: III—Montreal Club, Nov., 1949, p. 796.
Pre-War and Post-War Commercial Outside White House Paint Formulas as Compared by AZO Paint-O-Graphs—L. P. Larson and J. H. Calbeck, July, 1949, p. 463.
Protective Coatings in the Corps of Engineers—G. S. Cook, July, 1950, p. 541.
Titanium Pigments in House Paints—J. MacGuffie, Sept., 1948, p. 677.

PAINTS FOR METAL

Barium Potassium Chromate Pigment in Metal Protective Paints—A. J. Eickhoff and L. M. Kebrich, Apr., 1949, p. 188.
Butyl Titanate: Its Preparation, Polymerization and Use in Paint—G. Winter, June, 1951, p. 345.
Formulation of Copper Phthalocyanine Finishes—E. C. Botti, June, 1950, p. 408.
Formulation of Industrial Finishes (Metal)—M. A. Glaser, June, 1950, p. 418.
Investigation of Primers for Marine Atmospheric Environments—C. J. Vander Valk, May, 1949, p. 260.
Study of Primers for Ferrous Metals in an Atmospheric Exposure. Progress Report: IV—New England Club, Nov., 1948, p. 867.
Study of Primers for Ferrous Metals in an Atmospheric Exposure: V—New England Club, Nov., 1949, p. 792.

DUP030044192

Study of Primers for Ferrous Metals in an Atmospheric Exposure—New England Club, Dec., 1951, p. 879.
Vinyl Dispersion Resin Metal Coatings—C. W. Patton, Apr., 1951, p. 224.
Vinyl Resins in Industrial Coatings—R. W. Quarles, Oct., 1949, p. 699.

TRAFFIC PAINTS

New Developments for High Styrene-Butadiene Copolymers in Protective Coatings—R. E. Workman, Apr., 1949, p. 177.
Traffic Paint Studies—Progress Report: I—E. K. Zimmerman, June, 1949, p. 353.

INTERIOR FINISHES

Emulsion Paints—F. B. Stieg, Feb., 1950, p. 94.
Emulsion Paints From a Butadiene-Styrene Emulsion Copolymer—L. L. Ryden, N. G. Britt, and R. D. Visger, Apr., 1950, p. 292.
Fire and Toxic Gas Hazards of Paint Films—M. W. Westgate, Apr., 1948, p. 309.
Formulation Fundamentals of Trade Sales Finishes—S. Werthan, Mar., 1950, p. 182.
Methods of Test for Evaluation of Deep Tone Flat Wall Paints—New York Club, Nov., 1950, p. 873.
Water-in-Oil Emulsion Varnishes and Paints—W. Bosch, Nov., 1950, p. 878.

WATER AND EMULSION PAINTS

Bakelite Polystyrene Emulsions for Industrial Coating Applications—R. A. Brenneck, June, 1951, p. 352.
Coating Resins Based on Styrene—K. V. McCullough, Aug., 1950, p. 585.
Emulsion Paints—F. B. Stieg, Feb., 1950, p. 94.
Emulsion Paints From a Butadiene-Styrene Emulsion Copolymer—L. L. Ryden, N. G. Britt, and R. D. Visger, Apr., 1950, p. 292.
Emulsion Paints—Theory, Practice and Literature Survey—New York Club, Mar., 1950, p. 212.
Latest Developments in Emulsion Paints—W. Burr and P. R. Matvey, May, 1950, p. 347.
Latex Paint Progress—W. A. Henson, May, 1951, p. 298.
Post Plasticized Polystyrene Emulsion in Water Paints—F. J. Hahn, June, 1951, p. 332.
Water-in-Oil Emulsion Varnishes and Paints—W. Bosch, Nov., 1950, p. 878.

LACQUERS

Development of the New Military Lacquer Specification—W. A. Gottfried and R. A. Machlowitz, Jan., 1951, p. 53.
Dielectric Strength of Pigmented Lacquer Films—New York Club, Nov., 1949, p. 750.
Effect of Nitrocellulose Viscosity on Cold Check Resistance of a Wood Lacquer—E. Berberian, Aug., 1951, p. 490.
Improvements Derived From Using Resins Designed Specifically for Lacquers—J. O. Small, Jan., 1949, p. 23.
Lacquers for Paper—R. D. Ullrich and R. E. Boddorff, Jan., 1951, p. 6.
Mechanism of Plastification of Cellulose Derivatives—G. Champtetier, Jan., 1950, p. 77.
Newer Plasticizers for Cellulose Esters—J. K. Aiken and I. Williamson, Feb., 1951, p. 107.
Performance of Zinc Soaps in Sanding Sealers—R. Wendt, June, 1951, p. 378.
Pigments-Dispersion and Pigmented Products for Lacquers and Enamels—J. Crouet, Dec., 1948, p. 951.

DUP030044193

Santocel in Coatings—L. D. Shand, Feb., 1948, p. 175.
Solvent Release vs. Hardness of Lacquer Films—Los Angeles Club, Jan., 1948, p. 3.
Specification for the Evaluation of Cellulose Lacquer Resins—Birmingham Club, Jan., 1948, p. 29.
Use of Abietates as Plasticizers for Cellulose Lacquers—J. Petit and D. Boido, Mar., 1949, p. 144.

VARNISHES

Evolution of Insulating Varnishes Used in Building Electrical Machines—D. Pagani, Dec., 1949, p. 916.
Formulation of Industrial Finishes (Metal)—M. A. Glaser, June, 1950, p. 418.
Preparation of Varnishes With Maleinized Oils and Their Properties—S. S. Gutkin, June, 1951, p. 371.
Research on the Gasproofing of Tung Oil With Special Modified Phenolics—F. G. Oswald, Sept., 1950, p. 667.
Santocel in Coatings—L. D. Shand, Feb., 1948, p. 175.
Styrenation and Esterification of Tall Oil—W. Bosch and R. B. Drubel, Dec., 1951, p. 894.
Tall Oil Varnishes—Northwestern Club, Nov., 1948, p. 845.
Tall Oil Varnishes—Exposure Results—Northwestern Club, Nov., 1949, p. 841.
Water-in-Oil Emulsion Varnish and Paints—W. Bosch, Nov., 1950, p. 878.

SPECIALTIES

Applications of Chlorowax to Protective and Decorative Coatings—K. S. Wade, Aug., 1949, p. 496.
Chlorowax as a Paint Ingredient—K. S. Wade, July, 1948, p. 522.
Fungiciding Protective Coatings—O. Eisenschiml and V. N. Kalberg, Dec., 1948, p. 953.
Interior Tank Coatings—J. C. Moore and N. T. Phelps, May, 1948, p. 381.
Investigation of High Temperature Baking on Wood—New York Club, Aug., 1948, p. 627.
New Aspects of Rustproofing—A. Minich, May, 1949, p. 227.
Protective Coatings in the Corps of Engineers—G. S. Cook, July, 1950, p. 541.

MISCELLANEOUS

New Developments in High-Styrene-Butadiene Copolymers in Protective Coatings—R. E. Workman, Apr., 1949, p. 177.
Practical Application of Luminescence—M. J. Vogel, Nov., 1950, p. 905.
Protective Coatings in the Corps of Engineers—G. S. Cook, July, 1950, p. 541.
Formulation of Industrial Finishes (Metal)—M. A. Glaser, June, 1950, p. 418.
Vinyl Polymers in Surface Coatings—C. W. Patton, Mar., 1948, p. 267.

TEST METHODS

ABRASION

Abrasion Resistance With the Taber Abraser—R. W. Hill and G. S. Cook, June, 1948, p. 482.
Study of Methods for Determining Abrasion Resistance of Clear Floor Coatings: I—New York Club, Nov., 1949, p. 808.

DUP030044194

ADHESION

Adhesion of Wet Paint Films—C. Y. Hopkins and J. Harris, Aug., 1948, p. 610 .
Testing of Some Mechanical Properties of Clear Lacquer—H. W. Talen and N. A. Brunt, Dec., 1949, p. 929.

ANALYSIS

Object and Methods of Analytical Chemistry in the Field of Paint and Varnish—C. P. A. Kappelmeier, Oct., 1949, p. 716.

COLOR

Color Drift Control—S. O. Bowles, Sept., 1950, p. 675.
Color Standards—R. Prokop, Dec., 1950, p. 1143.
Spectrophotometry of Pigments—Los Angeles Club, Nov., 1949, p. 823.

CONSISTENCY

Standardization of Methods of Measuring Viscosities of Nitrocellulose Lacquers—New England Club, Nov., 1949, p. 735.
Standardization of the Ford Viscosity Cup—Chicago Club, Nov., 1949, p. 831.

DRYING TIME

Investigation of Methods for Measuring Drying Time—New York Club, Nov., 1948, p. 836.
Measurement of Print Resistance—New York Club, Sept., 1949, p. 634.
Proposed Method of Test for Measuring the Dust-Free Drying Time of Clear and Pigmented Coatings—Standards and Methods of Test Committee, Mar., 1949, p. 151.

EXPOSURE

Accelerated Yellowing Tests on White Enamels—Baltimore Club, Nov., 1950, p. 815.
Evaluation of Finishes for Douglas Fir Plywood—Detroit Club, Jan. 1948, p. 64.
Finishing of Douglas Fir Plywood—T. H. Moran, Nov., 1950, p. 900.
Floor Paint Vehicles—Golden Gate Club, Jan., 1948, p. 77.
Four Years' Results of Exterior House Paint Test Program—S. Werthan, Mar., 1948, p. 279.
Paint Proving in South Florida—O. J. Sieplein, Apr., 1950, p. 309.
Philosophy of Paint Exposure Testing—C. A. Lominska, Oct., 1950, p. 691.
Weathering Machine Correlation in the Cleveland Club and Other Areas: I—Cleveland Club, Jan., 1948, p. 44.
Weathering Machine Correlation in the Cleveland Club and Other Areas: II—Chalking Rate Measurement—Cleveland Club, Nov., 1948, p. 813.

FIRE RESISTANCE

Fire and Toxic Gas Hazards of Paint Films—M. W. Westgate, Apr., 1948, p. 309.
Proposed Method of Test for Fire-Retardant Properties of Paints on Wood by the Cabinet Apparatus—Standards and Methods of Test Committee, Mar., 1949, p. 153.

GLOSS

Instrument for the Routine Measurement of Gloss—S. Hochberg and M. P. Morse, July, 1950, p. 516.

GRIND

Evaluation of Production Club Fineness Gauge and Paint Film Characteristics Based on Particle Size Distribution of Pigment Dispersion—C. P. Baker and J. F. Vozzella, Dec., 1950, p. 1076.
Reading the Hegman Grind Gauge—D. Doubleday and A. Barkman, Aug., 1950, p. 233.

DUP030044195

HIDING

Hiding Power of Synthetic Iron Oxides—Toronto Club, Nov., 1950, p. 850.
Method for the Determination of Hiding Power of Pigments—Toronto Club, Nov., 1948, p. 900.
Method of Measuring Dry Hiding Power of Paint—New York Club, Nov., 1951, p. 758.
Proposed Method of Test for Dry Hiding Power of Paint—Standards and Methods of Test Committee, Mar., 1949, p. 149.

SETTLING

Modified Feely-Sandford Penetrometer and Its Application: III—Toronto Club, Nov., 1949, p. 744.

VISCOSITY

Calibration of Gardner-Holdt Air Bubble Viscometers—C. Holdt, Feb., 1949, p. 90.
Standardization of Methods of Measuring Viscosities of Nitrocellulose Lacquers—New England Club, Nov., 1948, p. 835.
Viscosity Tubes—W. T. Harvey and S. S. Kurtz, Jr., June, 1949, p. 373.

YELLOWING

Accelerated Yellowing Tests on White Enamels—Baltimore Club, Nov., 1950, p. 815.

MISCELLANEOUS

Accelerated Storage Test for Paints—N. B. Garlock, May, 1951, p. 306.
Applications of the Spectrographic Method for Studying the Resin-Bodying of Drying Oils—E. A. Hauser and F. J. Kolb, Jr., Jan., 1948, p. 84.
Color Photography as a Technical Aid in the Scientific Study of Paint Products—Golden Gate Club, Nov., 1949, p. 806.
Dielectric Strength of Pigmented Lacquer Films—New York Club, Nov., 1949, p. 750.
Effect of Aluminum Stearate on Embrittlement of Highly Pigmented Oil Films—CDIC Club, Nov., 1948, p. 826.
Evaluation of Alkyd Resins for Stoving Finishes—Birmingham Club, Nov., 1950, p. 863.
Evaluation of Paint Straining Methods and Equipment—Chicago Club, Nov., 1951, p. 766.
Method for the Evaluation of Hard Varnish Resins and Oil Modified Resin Solutions—Birmingham Club, Dec., 1949, p. 940.
Methods of Test for Evaluation of Deep Tone Flat Wall Paints—New York Club, Nov., 1950, p. 873.
Newer Plasticizers for Cellulose Esters—J. K. Aiken and I. Williamson, Feb., 1951, p. 107.
Oil Absorption—A New Assessment—E. Marsden, Dec., 1948, p. 962.
Proposed Modification of the Kauri Reduction Test—S. C. Robison, Mar., 1950, p. 233.
Protective Coatings in the Corps of Engineers—G. S. Cook, July, 1950, p. 541.
Relationship Between Leaching Rate Tests and Anti-Fouling Paint Performance—O. Irish, July, 1951, p. 433.
Small Order Manufacture: Product Control—J. P. Cornell, Dec., 1950, p. 1133.
Smooth-Surfaced Resilient Floor Coverings—H. W. Crockett, Feb., 1950, p. 94.
Solvent Release vs. Hardness of Lacquer Films—Los Angeles Club, Jan., 1948, p. 3.
Specification for the Evaluation of Cellulose Lacquer Resins—Birmingham Club, Jan., 1948, p. 29.
Strength of Surface Coating Films—H. Grinsfelder, Jan., 1951, p. 42.

DUP030044196

Study of Pigment Dispersion: II—New York Club, Nov., 1948, p. 891.
Study of the Dielectric Strength of Paint, Varnish and Lacquer Films—New York Club, Jan., 1948, p. 9.
Suggested Modification for Determining Shear Hardness With the Taber Abraser—R. W. Hill and G. S. Cook, Apr., 1948, p. 339.
Testing of Some Mechanical Properties of Clear Lacquer—H. W. Talen and N. A. Brunt, Dec., 1949, p. 929.
Theoretical and Statistical Study of Sward Rocker Hardness Determination of Paint Films—D. J. Baker, A. J. Elleman, and A. N. McKelvie, Dec., 1950, p. 1048.
Water and Alkali Tests—Cleveland Club, Dec., 1950, p. 1042.

GENERAL

Development of the New Military Lacquer Specification—W. A. Gottfried and R. A. Machlowitz, Jan., 1951, p. 53.
Methods of Test (Laboratory)—Philadelphia Club, Jan., 1948, p. 96.

EQUIPMENT AND MANUFACTURING

COOKING

Application of the Votator Heat Exchanger in the Paint and Varnish Industry—M. Sutton and A. Bond, Jr., June, 1949, p. 300.
Continuous Process of Oil Bodying and Varnish Manufacturing—M. Meyer, June, 1948, p. 485.
Continuous Process of Oil Bodying and Varnish Manufacturing (A Resume of Patents)—Philadelphia Club, Jan., 1948, p. 150.
Controlled Heat-Release for Processing Chemicals—C. E. Cunningham, Aug., 1949, p. 526.
Fume Control in the Paint and Varnish Industry: I—C. W. Selheimer and H. F. Bauman, Sept., 1951, p. 531.
Fume Control in the Paint and Varnish Industry: II—C. W. Selheimer, W. Muttera, F. Zavasnik, and R. Novak, Sept., 1951, p. 531.
Fume Control in Varnish Manufacture—H. L. Barneby and C. J. McWhorter, Dec., 1948, p. 1037.
Kettles—C. J. Schumann, Mar., 1948, p. 290.
Kettles—J. A. Murphy, June, 1948, p. 484.
Stationary Closed Kettles in Varnish Plants—W. L. Badger, Dec., 1948, p. 1030.
Ventilation, Fume and Dust Control in the Paint Industry—A. J. Kleissler, Feb., 1950, p. 133.

CURING

Comparison of Infrared and Convection Oven Baking—New York Club, Jan., 1948, p. 139.

GRINDING

Ball Mills—H. M. Brown, Sept., 1948, p. 668.
Dispersion Studies of Titanium Dioxide Pigment—W. Von Fischer, W. D. Trautman, and J. Friedman, Nov., 1949, p. 843.
Effect of Temperature on the Dispersion of Titanium Dioxide in Alkyd Resin-Mineral Spirits by Means of a Pebble Mill—P. Baker and J. F. Vozzella, July, 1949, p. 433.
Equipment and Methods for Manufacturing Paint—A. Barkman, Sept., 1950, p. 630.
Fluid Energy Mills—N. N. Stephanoff, Sept., 1949, p. 590.
Invasion of Modern Technique in the Art of Pigment Dispersion—W. C. Chamberlain, Sept., 1950, p. 663.
Investigation of the Mechanical Action in a Steel Ball Mill—G. B. Wheeler, Jr., Dec., 1948, p. 992.

DUP030044197

Operation and Care of Roller Mills—E. F. Berger, Jan., 1949, p. 36.
Optimum Conditions of Operating Ball Mills—M. F. Appell, Apr., 1950, p. 315.
Pigment Dispersions by Flushing Technique—W. C. Parle, Sept., 1949, p. 606.
Pigment Dispersion With Ball and Pebble Mills—E. K. Fischer, C. J. Rolle, and L. W. Ryan, Dec., 1948, p. 1050.
Practical Aspects of Pigment Dispersion—W. H. Hoback, May, 1951, p. 255.
Preliminary Investigation of Pigment Dispersion by Means of the Ultrasonorator—Pittsburgh Club, Nov., 1949, p. 781.
Preliminary Study of Fine Pigment Dispersion on the Morehouse Mill —CDIC Club, Nov., 1951, p. 751.
Principle of Grinding Paint on a Carborundum Stone Mill—G. H. Morehouse, Apr., 1949, p. 199.
Roller Mill Equipment—W. J. Grant, Sept., 1949, p. 599.
Roll Mill, Pebble Mill and Kneader as Pigment Dispersion Equipment —C. P. Baker and J. F. Vozzella, Aug., 1951, p. 467.
Review of Some Mixing and Grinding Equipment—S. R. Mountsier, Jr., Apr., 1951, p. 233.
Study of Pigment Dispersion: III—New York Club, Dec., 1950, p. 977.
Study of the Factors Affecting Grinding Efficiency in Ball and Pebble Mills—Baltimore Club, Nov., 1948, p. 859.
Ultrasonics as an Invasion Into the Art of Pigment Dispersion—A. N. Thomson, Sept., 1950, p. 659.

GENERAL

Astral Celluco Plant at Montataire—J. S. Long, Jan., 1950, p. 69.
Basic Principles of Materials Handling—R. M. Aude, Dec., 1948, p. 1012.
Comparative Study of Hand and Machine Filling—New England Club, Jan., 1948, p. 108.
Evaluation of Paint Straining Methods and Equipment—Chicago Club, Nov., 1951, p. 766.
Filling and Packaging—G. R. Stevens, Dec., 1948, p. 1067.
Filtering and Straining Varnishes and Paints—A. C. Kracklauer, Dec., 1948, p. 1065.
Filtration and Filtration Equipment in the Paint Industry—J. A. Plummer, Mar., 1951, p. 158.
Hot-Spray Application of Lacquer—F. E. Piech, Oct., 1950, p. 721.
Materials Handling—J. Mathews, July, 1950, p. 523.
Materials Handling Principles and Applications—S. C. Lobdell, Feb., 1951, p. 92.
Meters for the Paint Industry—D. W. Kingsley, July, 1948, p. 550.
Modern Paint Plant—S. E. Freeman, Dec., 1948, p. 995.
New Equipment—H. Shuger, Jan., 1948, p. 106.
Principles of Fluid Mixing and the Application of Mixing Devices—H. E. Serner, Dec., 1948, p. 1046.
Proportioning Equipment as Related to Volume Measurement—G. J. Klopfenstein, Dec., 1948, p. 1025.
Proportioning Equipment as Related to Weight Measurement—J. R. Hanley, Dec., 1948, p. 1027.
Pumps for Transferring Liquids in the Paint and Varnish Industry—L. M. Barish, July, 1948, p. 537.
Safety in Lacquer Manufacture—C. L. Jones, Feb., 1950, p. 145.
Survey of the Methods of Straining Employed in the Paint Industry —New England Club, Nov., 1951, p. 779.
Torquemeter for Measuring Power to Plant Mixers—V. W. Uhl, Nov., 1950, p. 885.
What Methods Are Best for Adequate Cleaning of Equipment?—Northwestern Club, Apr., 1949, p. 217.

RAW MATERIALS

OILS

Linseed

Contribution to the Study of the Reaction Between Styrene and Linseed Oil—J. Petit and P. Fournier, Aug., 1950, p. 609.

Soybean

Reactivity of Some Special Oils With Basic Pigments—Northwestern Club, Nov., 1949, p. 838.

Study of Soya-Tung Oil Combinations—Pittsburgh Club, Nov., 1948, p. 854.

Uses of Soybean Oil in the Paint Industry—F. Scofield, June, 1948, p. 438.

Versatile Role of Soybean Oil in Coatings—A. G. Hovey, Sept., 1948, p. 697.

Synthetic

Preparation of Several Fatty Acid Esters for Films Studies—W. O. Lundberg and J. R. Chipault, Jan., 1949, p. 11.

Styrene Copolymers—E. A. Bevan, Mar., 1951, p. 165.

Styrene in Protective and Decorative Coatings: I—Detroit Club, Nov., 1948, p. 861.

Styrenated Oils—N. R. Peterson, Aug., 1948, p. 596.

Styrenated Oils and Alkyds—A. E. Young, Sept., 1949, p. 610.

Utilization of By-Products From the Manufacture of Synthetic Fatty Acids in the Paint and Varnish Industry—P. Colomb, May, 1949, p. 274.

Tall

Effect of Polyol Variation in Tall Oil Ester Coatings—R. W. Tess and C. A. May, Dec., 1950, p. 1114.

Tall Oil in the Paint Industry—W. A. Wachholtz, June, 1948, p. 446.

Tall Oil Varnishes—Northwestern Club, Nov., 1948, p. 845.

Tall Oil Varnishes—Exposure Results—Northwestern Club, Nov., 1949, p. 841.

Tung

Philadelphia Club's Heat Treatment of Tung Oil—D. Davidson, Apr., 1948, p. 343.

Research on the Gasproofing of Tung Oil With Special Modified Phenolics—F. G. Oswald, Sept., 1950, p. 667.

Study of Soya-Tung Oil Combination—Pittsburgh Club, Nov., 1948, p. 854.

General

American Chemists' Wartime Contribution to Drying Oils—A. C. Schwarcman, Apr., 1948, p. 325.

Applications of the Spectrographic Method for Studying the Resin-Bodying of Drying Oils—E. A. Hauser and F. J. Kolb, Jr., Jan., 1948, p. 84.

Cameline Oil and Its Use in Paints—M. Carriere, Mar., 1949, p. 144.

Comparative Bulk Oxidation of Drying and Non-Drying Oils—P. S. Hess and G. A. O'Hare, Mar., 1951, p. 144.

Continuous Process of Oil Bodying and Varnish Manufacturing (A Resume of Patents)—Philadelphia Club, Jan., 1948, p. 150.

Continuous Process of Oil Bodying and Varnish Manufacturing—M. Meyer, June, 1948, p. 485.

Contribution to the Study of Isano Oil and Its Industrial Application—M. Fauve, Jan., 1949, p. 38.

Copolymers: The New Paint Vehicles—A. G. Hovey and R. D. Jerabek, Mar., 1951, p. 171.

Dimer Acids—D. T. Moore, Jan., 1951, p. 33.

Drying Oil Polymerization—J. J. Mattiello and E. Sunderland, Feb., 1948, p. 216.

Film Formation, Film Properties, Film Deterioration—J. S. Long, Oct., 1949, p. 648.
Interrelationship of Supply, Price, and Use of Fats and Oils—S. O. Sorenson, July, 1951, p. 452.
Kinetics of Esterification and the Properties of Drying Oils From Diglycerol—Northwestern Club, Nov., 1950, p. 827.
Modern Aspects of the Chemistry of Drying Oils—C. P. A. Kappelmeier, Apr., 1949, p. 209.
New Developments in Drying Oil and Varnish Technology—T. F. Bradley, Nov., 1950, p. 795.
Pentaerythritol-Based Coatings—H. Burrell, Apr., 1948, p. 326.
Preparation of Several Fatty Acid Esters for Film Studies—W. O. Lundberg and J. R. Chipault, Jan., 1949, p. 11.
Preparation of Varnishes With Maleinized Oils and Their Properties—S. S. Gutkin, June, 1951, p. 371.
Properties and Uses of High Iodine Number Drying Oils—S. S. Gutkin, May, 1950, p. 359.
Raw and Processed Drying Oils—R. L. Terrill, Mar., 1949, p. 115.
Recent Developments in Drying Oil Research—R. L. Terrill, Sept., 1951. p. 573.
Review of Developments in Drying Oils—R. L. Terrill, July, 1950, p. 527.
Styrenated Oils—N. R. Peterson, Aug., 1948, p. 596.
Styrene Copolymers—E. A. Bevan, Mar., 1951, p. 165.
Styrene in Protective and Decorative Coatings: I—Detroit Club, Nov., 1948, p. 861.
Theory of Catalysis Through Polar Molecules and Its Application in the Field of Drying Oils—R. Jacquemain and J. Berger, May, 1949, p. 272.

DRIERS

Anionics of Driers—A. Minich, July, 1950, p. 533.
Comparison of Octoate and Naphthenate Driers—G. Fearnley, Mar., 1949, p. 137.
Development of Replacements for Critical Materials in the Paint Drier Field—H. Packer, June, 1951, p. 340.
Driers—C. A. Klebsattel, Sept., 1948, p. 686.
Paint and Varnish Control Through the Medium of Additives—G. W. Gregg, Mar., 1951, p. 186.
Present Day Tall Oil Driers—G. G. Unkefer, May, 1951, p. 301.
Special Aspects of Driers and Drying—F. S. Greenawald, June, 1948, p. 467.
Spotlighting the Variables of Drying—W. J. Gort and F. S. Greenawald, Aug., 1950, p. 560.

PIGMENTS

White

Basic Silicate White Lead 45X. A New Pigment Concept—E. P. Peterson, Feb., 1948, p. 208.
Co-Fumed Leaded Zinc Oxide in House Paints—C. H. Adams, June, 1950, p. 444.
Dispersion Studies of Titanium Dioxide Pigment—W. Von Fischer, W. D. Trautman, and J. Friedman, Nov., 1949, p. 843.

DUP030044200

Effect of White Pigments on Physical Properties of Paint Films—E. J. Dunn, Jr., and C. H. Baier, Oct., 1948, p. 743.
Effect of Zinc Oxide on Architectural White Alkyd Enamels—Western New York Club, Nov., 1950, p. 806.
Lead Pigments and Paints—A. Stewart, Dec., 1950, p. 1100.
Research and Development in the Manufacture of Rutile Calcium Pigments—H. V. Alessandroni, Aug., 1949, p. 504.
Rutile Titanium Calcium Pigments in Trade Sales Coatings—F. B. Steig, Aug., 1949, p. 514.
Some Formulation Fundamentals of Trade Sales Finishes—S. Werthan, Mar., 1950, p. 182.
Titanium Pigments in House Paints—J. Mac Guffie, Sept., 1948, p. 677.

Color

Channel and Furnace Carbon Blacks—G. J. Duffy, June, 1949, p. 347.
Flooding and Floating of Multi-Pigment Paint Systems—New York Club, Dec., 1951, p. 867.
Formulation of Copper Phthalocyanine Finishes—E. C. Botti, June, 1950, p. 408.
Hiding Power of Synthetic Iron Oxides—Toronto Club, Nov., 1950, p. 850.
Jet-Milled Pigments—C. W. Moore, May, 1950, p. 373.
New Look—G. M. Babcock and F. B. Rethwisch, Feb., 1949, p. 80.
Physical Chemical Research in the Protective Coatings Industry—R. H. Kienle, Jan., 1950, p. 11.
Protective Coatings in the Corps of Engineers—G. S. Cook, July, 1950, p. 541.
Study in Black—G. J. Duffy, Jan., 1951, p. 28.
Study of the Stability of Orange Pigments—Philadelphia Club, Dec., 1951, p. 863.
Study of the Stability of Yellow Pigments—Philadelphia Club, Nov., 1948, p. 880.

Miscellaneous

Barium Potassium Chromate Pigment in Metal Protective Paints—A. J. Eickhoff and L. M. Kebrich, Apr., 1949, p. 188.
Bentonite Flatting and Gelling Agents—O. P. Muller, J. W. Jordan, and J. J. Brancato, July, 1949, p. 451.
Electron Microscopy in Relation to Paint Pigments—H. S. Davidson, Oct., 1950, p. 753.
Investigation of Primers for Marine Atmospheric Environments—C. J. Vander Valk, May, 1949, p. 260.
New Aluminum Paste Pigments—R. I. Wray, June, 1948, p. 441.
New Raw Materials—W. P. Colio, Jan., 1948, p. 104.
Oil Absorption—A New Assessment—E. Marsden, Dec., 1948, p. 962.
Performance of Zinc Soaps in Sanding Sealers—R. Wendt, June, 1951, p. 378.
Pigments-Dispersion and Pigmented Products for Lacquers and Enamels—J. Crouet, Dec., 1948, p. 951.
Recent Developments in Iron Oxide Red Pigments—G. E. Noponen and T. J. Skotnicki, Feb., 1949, p. 61.
Sorption-Desorption Characteristics of Hydrous Oxide Pigments—W. O. Milligan, H. B. Whitehurst, and G. L. Bushey, Aug., 1948, p. 601.
Spectrophotometry of Pigments—Los Angeles Club, Nov., 1949, p. 823.
Stearates in the Protective Coatings Industry—F. J. Licata, Apr., 1949, p. 165.
Studies in the Evaluation of Aluminum Pigments—A. Knoll, July, 1951, p. 447.

RESINS

Alkyd

Alkyd Resins—C. C. West, Oct., 1948, p. 773.
Alkyd Resin Technology—C. L. Levesque, Mar., 1948, p. 245.
Characteristics and Applications of Modern Coating Resins—W. H. Patrick, Oct., 1951, p. 615.
Cure Plate as a Possible Tool for Alkyd Manufacture—Golden Gate Club, Nov., 1948, p. 832.
Effect of Zinc Oxide on Architectural White Alkyd Enamels—Western New York Club, Nov., 1950, p. 806.
Evaluation of Alkyd Resins for Stoving Finishes—Birmingham Club, Nov., 1950, p. 863.
Formulation of Industrial Finishes (Metal)—M. A. Glaser, June, 1950, p. 418.
Pentaerythritol-Based Coatings—H. Burrell, Apr., 1948, p. 326.
Prediction of the Storage Stability Properties of Alkyd Resin Enamels—R. L. Savage and M. C. Schroeder, Dec., 1951, p. 886.
Preparation of Alkyds and Additional Esters for Film Studies—J. R. Chipault, M. J. Hendrickson, and W. O. Lundberg, Jan., 1950, p. 53.
Preparation of Monoglycerides in View of the Manufacture of Modified Alkyd Resins—J. Petit, Dec., 1948, p. 977.
Properties of Petroleum Solvents as Related to the Viscosity of Alkyd Resin Solutions—C. M. Shaw, Nov., 1950, p. 891.
Styrenated Alkyds—W. C. Norris, Apr., 1949, p. 173.
Styrenated Oils and Alkyds—A. E. Young, Sept., 1949, p. 610.
Two Years of Styrenated Alkyd Resins for Surface Coatings—W. H. Patrick and E. H. Trussell, Oct., 1950, p. 767.

Phenolic

Research on the Gasproofing of Tung Oil With Special Modified Phenolics—F. G. Oswald, Sept., 1950, p. 667.

Rosin Derivatives

Improvements Derived From Using Resins Designed Specifically for Lacquers—J. O. Small, Jan., 1949, p. 23.
Pentaerythritol-Based Coatings—H. Burrell, Apr., 1948, p. 326.
Use of Hard Resins and Oleoresinous Compositions in the Modification of Oxidizing Alkyds—F. G. Oswald, Aug., 1949, p. 545.
Use of Modified Rosin in the Paint Industry During the War and in the Future—A. Weiss, R. Uzac, G. Vassiliev, and J. Brodschi, Mar., 1948, p. 261.

Other Synthetics

Amino Resins—C. D. Thurmond, May, 1950, p. 381.
Applications of Chlorowax to Protective and Decorative Coatings—K. S. Wade, Aug., 1949, p. 496.
Chemistry and Application of Urea and Melamine Resins for Surface Coatings—W. C. Norris and J. C. Bacon, Oct., 1948, p. 785.
Coating Resins Based on Styrene—K. V. McCullough, Aug., 1950, p. 585.
Contribution to the Study of the Reaction Between Styrene and Linseed Oil—J. Petit and P. Fournier, Aug., 1950, p. 609.
Copolymers: The New Paint Vehicles—A. G. Hovey and R. D. Jerabek, Mar., 1951, p. 171.
Development of Synthetic Resins for Protective Coatings—H. Burrell, July, 1948, p. 515.
Drying Oils and Resins From Petroleum Sources—R. J. Lee, L. M. Adams, and E. E. McSweeney, Feb., 1948, p. 184.
Effect of Polyol Variation in Tall Oil Ester Coatings—R. W. Tess and C. A. May, Dec., 1950, p. 1114.

Evaluation of Certain Hydrocarbon Resins—CDIC Club, Jan., 1948, p. 125.
Further Investigation of Aqueous Dispersions of Vinyl Polymers—Chicago Club, Jan., 1948, p. 114.
Latest Developments in Emulsion Paints—W. Burr and P. R. Matvey, May, 1950, p. 347.
New Developments for High Styrene-Butadiene Copolymers in Protective Coatings—R. E. Workman, May, 1949, p. 177.
New Developments in Drying Oil and Varnish Technology—T. F. Bradley, Nov., 1950, p. 795.
Pliolite S-5 Resin—W. Burr, Feb., 1948, p. 198.
Recent Developments in Synthetic Resins for Protective Coatings—L. R. Whiting, June, 1948, p. 473.
Review of the Fundamental Chemistry of and Applications for Some Amino Resins—C. H. Parker, Apr., 1951, p. 237.
Specification for the Evaluation of Cellulose Lacquer Resins—Birmingham Club, Jan., 1948, p. 29.
Styrenation of Allylsucrose Improves Its Properties as a Coating Material—A. N. Wrigley and M. Zief, Apr., 1950, p. 302.
Styrene Copolymers—E. A. Bevan, Mar., 1951, p. 165.
Styrene in Protective and Decorative Coatings: I—Detroit Club, Nov., 1948, p. 861.
Vinyl Dispersion Resin Metal Coatings—C. W. Patton, Apr., 1951, p. 224.
Vinyl Polymers in Surface Coatings—C. W. Patton, Mar., 1948, p. 267.

Silicone

Formulation and Uses of Silicone Protective Coatings—W. W. Pederson, July, 1948, p. 529.
Silicone Applications for the Paint Industry—J. W. Raynolds, Nov., 1950, p. 896.
Silicones in Protective Coatings—G. S. Cook and D. W. Kennedy, Oct., 1951, p. 629.
Silicones—Versatile Synthetic Polymers—W. T. Collings, Sept., 1949, p. 626.

Vinyl

Further Investigation of Aqueous Dispersions of Vinyl Polymers—Chicago Club, Jan., 1948, p. 114.
Vinyl Resins in Industrial Coatings—R. W. Quarles, Oct., 1949, p. 699.

General

Allylsucrose: A Potential Upgrader for Drying Oils—M. Zeif, Oct., 1949, p. 711.
Bakelite Polystyrene Emulsions for Individual Coating Applications—R. A. Brenneck, June, 1951, p. 352.
Characteristics and Applications of Modern Coating Resins—W. H. Patrick, Oct., 1951, p. 615.
Coordination and Cooperation in Synthetic Resin Development—H. M. Enterline, May, 1949, p. 254.
Dimer Acids—D. T. Moore, Jan., 1951, p. 33.
Film-Forming Capacity of Unsaturated Polyesters—A. V. Blom, Feb., 1949, p. 85.
Lacquers for Paper—R. D. Ullrich and R. E. Boddorff, Jan., 1951, p. 6.
Latex Paint Progress—W. A. Henson, May, 1951, p. 298.
Pentaerythritol-Based Coatings—H. Burrell, Apr., 1948, p. 326.
Post Plasticized Polystyrene Emulsion in Water Paints—F. J. Hahn, June, 1951, p. 332.
Recent Developments in Synthetic Resins for Protective Coatings—L. R. Whiting, June, 1948, p. 473.

DUP030044203

Resinography of Protective and Decorative Coatings—T. G. Rochow, May, 1948, p. 400.
Solubilization and Film-Forming Properties of High Polymers—P. Clement, June, 1949, p. 368.

SOLVENTS

Application of Solvents in the Paint Industry—D. D. Rubek, June, 1949, p. 326.
Formulation of Copper Phthalocyanine Finishes—E. C. Botti, June, 1950, p. 408.
Hot-Spray Application of Lacquer—F. E. Piech, Oct., 1950, p. 721.
Hydrocarbon Solvents: Types and Uses—J. K. Boggs, Oct., 1948, p. 719.
Lower Limit of Flammability of Vapors From Paint Solvents—M. Stervinou, Feb., 1950, p. 161.
New Raw Materials—W. P. Colio, Jan., 1948, p. 104.
Petroleum Solvents—F. Preu, Oct., 1950, p. 745.
Physical Chemical Research in the Protective Coatings Industry—R. H. Kienle, Jan., 1950, p. 11.
Properties of Petroleum Solvents as Related to the Viscosity of Alkyd Resin Solutions—C. M. Shaw, Nov., 1950, p. 891.
Safety and Hazards in Handling Solvents in Paint and Varnish Plants—A. C. Belyea, Feb., 1950, p. 136.
Toxicity of Solvents—W. A. Cook and L. E. Gordan, Feb., 1950, p. 124.

PLASTICIZERS

Lacquers for Paper—R. D. Ullrich and R. E. Boddorff, Jan., 1951, p. 6.
Mechanism of Plastification of Cellulose Derivatives—G. Champtetier, Jan., 1950, p. 77.
Newer Plasticizers for Cellulose Esters—J. K. Aiken and I. Williamson, Feb., 1951, p. 107.
New Resinous Plasticizer for Nitrocellulose Lacquers—D. E. Floyd, W. S. Baldwin and M. S. Herban. Aug., 1951, p. 502.
Plasticizers, Properties and Uses in Film Forming Materials—G. R. Buchanan, Aug., 1950, p. 574.
Plasticizers, the X in Plastics—H. S. Bergen, Feb., 1949, p. 72.
Post Plasticized Polystyrene Emulsion in Water Paints—F. J. Hahn, June, 1951, p. 332.
Use of Abietates as Plasticizers for Cellulose Lacquers—J. Petit and D. Boido, Mar., 1949, p. 144.

MISCELLANEOUS

Butyl Titanate: Its Preparation, Polymerization and Use in Paint—G. Winter, June, 1951, p. 345.
Chlorowax as a Paint Ingredient—K. S. Wade, July, 1948, p. 522.
Contributions by the Shell Companies to the Paint, Varnish, and Lacquer Industries—T. F. Bradley, June, 1948, p. 452.
Emulsion Paints From a Butadiene-Styrene Emulsion Copolymer—L. L. Ryden, N. G. Britt, and R. D. Visger, Apr., 1950, p. 292.
Flooding and Floating of Multi-Pigment Paint Systems—New York Club, Dec., 1951, p. 867.
Floor Paint Vehicles—Golden Gate Club, Jan., 1948, p. 77.
Microbiology of Mildewed Paint Surfaces—A. Minich, Apr., 1948, p. 305.
New Aspects of Rustproofing—A. Minich, May, 1949, p. 227.
New Raw Materials—W. P. Colio, Jan., 1948, p. 104.
Paint and Varnish Control Through the Medium of Additives—G. W. Gregg, Mar., 1951, p. 186.
Preparation and Properties of Allyl Pectin—E. C. Dryden, A. N. Wrigley, and J. J. Willaman, Oct., 1950, p. 779.
Silicone Applications for the Paint Industry—J. W. Raynolds, Nov., 1950, p. 896.
Styrenation of Allylsucrose Improves Its Properties as a Coating Material—A. N. Wrigley and M. Zief, Apr., 1950, p. 302.

FINISHING

APPLICATION

Finishing of Douglas Fir Plywood—T. H. Moran, Nov., 1950, p. 900.
Hot-Spray Application of Lacquer—F. E. Piech, Oct., 1950, p. 721.
Industrial Finishes and Finishing—F. G. Weed and N. P. Beckwith, May, 1948, p. 383.
Metal Surfaces—Their Preparation and Painting—G. Diehlman, A. J. Eickhoff, and J. G. Wills, May, 1948, p. 357.
Painting Aluminum Structures—R. I. Wray and J. D. Edwards, Apr., 1948, p. 315.
Recent Developments in Synthetic Resins for Protective Coatings—L. R. Whiting, June, 1948, p. 473.

CURING

Industrial Finishes and Finishing—F. G. Weed and N. P. Beckwith, May, 1948, p. 383.
Vinyl Dispersion Resin Metal Coatings—C. W. Patton, Apr., 1951, p. 224.

SURFACE PREPARATION

Automobile Finishes and Their Applications—J. W. Ferguson, Aug., 1949, p. 562.
Industrial Finishes and Finishing—F. G. Weed and N. P. Beckwith, May, 1948, p. 383.
Metal Surfaces—Their Preparation and Painting—G. Diehlman, A. J. Eickhoff, and J. G. Wills, May, 1948, p. 357.
Recent Developments in Synthetic Resins for Protective Coatings—L. R. Whiting, June, 1948, p. 473.
Surface Preparation Science for Industry and Research—A. J. Liebman, Sept., 1951, p. 558.

RESEARCH

FEDERATION

Changes in the Infrared Spectra of Some Synthetic Oils as a Function of Drying Time—K. Adams, R. W. Auxier, and C. E. Wilson, Nov., 1951, p. 669.
Chemical Changes in Films With Aging—R. E. Dunbar, Dec., 1951, p. 857.
Chemical Composition and Adsorption Properties of Clear Films—G. C. Williams, Dec., 1950, p. 1020.
Chemistry of the Autoxidation of Drying Oils—W. O. Lundberg, Mar., 1950, p. 199.
Depth to Which Oxygen Penetrates Drying Oil Films—L. L. Carrick and W. J. Snoddon, Nov., 1951, p. 682.
Film Formation, Film Properties, Film Deterioration—J. S. Long, Oct. 1949, p. 648.
Gain in Weight of Clear Films Prepared From Vehicles—F. Scofield, Dec., 1950, p. 1012.
Hardness, Abrasion Resistance, and Accelerated Weathering Tests on Pure, Pigmented and Unpigmented Paint Vehicles—E. B. Kiser and J. H. Coulliette, Nov., 1951, p. 724.
Outdoor Exposure Results of Clear and Pigmented Pure Liquids at the Six Months Period—CDIC Club, Dec., 1950, p. 1033.
Oxidation of Films of Unsaturated Fatty Acid Esters—W. O. Lundberg, E. C. Nickell, and J. R. Chipault, Nov., 1951, p. 740.
Porosity of Paint Films—B. L. Harris and I. Wolock, Sept., 1950, p. 645.
Preparation of Alkyds and Additional Esters for Film Studies—J. R. Chipault, M. J. Hendrickson, and W. O. Lundberg, Jan., 1950, p. 53.
Preparation of Several Fatty Acid Esters for Film Studies—W. O. Lundberg and J. R. Chipault, Jan., 1949, p. 11.
Refractive Index Measurements—R. E. Dunbar, Dec., 1951, p. 861.

DUP030044205

Report on Projects 13 and 22 of the Pure Compound Program—Southern Club, Apr., 1951, p. 218.
Shrinkage of Some Organic Film Forming Materials During Aging—L. L. Carrick and A. J. Permoda, Nov., 1951, p. 692.
Size, Shape and Weight of Molecules of Vehicles Used in Research Program—J. S. Long and W. R. Lanton, Dec., 1950, p. 1006.
Stress-Strain Properties of Clear and Pigmented Films of Pure Drying Oil Compounds—A. C. Elm, Nov., 1951, p. 701.

GENERAL

Contribution to the Study of the Reaction Between Styrene and Linseed Oil—J. Petit and P. Fournier, Aug., 1950, p. 609.
Evaluation of Production Club Fineness Gauge and Paint Film Characteristics Based on Particle Size Distribution of Pigment Dispersions—C. P. Baker and J. F. Vozzella, Dec., 1950, p. 1076.
Factors Affecting the Rheological Properties of Paints and Lacquers—E. Chadwick, Oct., 1951, p. 636.
Fume Control in the Paint and Varnish Industry: I—C. W. Selheimer and H. F. Bauman, Sept., 1951, p. 531.
Fume Control in the Paint and Varnish Industry: II— C. W. Selheimer, W. Muttera, F. Zavasnik, and R. Novak, Sept., 1951, p. 531.
Macromolecular Chemistry and Progress in the Paint and Varnish Industry—G. Champetier, Aug., 1948, p. 578.
