

LEGISLATIVE HISTORY
of
LEAD-BASED PAINT POISONING PREVENTION ACT
(Public Law 91-695)

Early in the 91st Congress (March, 1969), Rep. William F. Ryan (D-N.Y.) introduced the first bill to provide Federal financial assistance to States and their subdivisions for projects involving the detection and treatment of lead poisoning in children and for the rehabilitation of areas found to be seriously contaminated by old lead-based paints. Subsequently, approximately 50 members of both the House and Senate demonstrated a recognition of this serious problem and strong bi-partisan support by introducing similar legislative proposals or joining as sponsor thereof. One of these bills (S. 3941) -- introduced by Senator Richard S. Schweiker (R - Pa.) -- contained a provision making it unlawful "for any person to apply or otherwise use, after the effective date of the Act, any paint with an excess of 1 per centum lead pigments or lead additives on the interior of any dwelling..."

The first public hearings on this legislation were not held until July 30, 1970 when the Housing Subcommittee of the House Banking and Currency Committee heard witnesses testify on H.R. 17260, the bill introduced by Rep. William A. Barrett (D - Pa.), Chairman of the Housing Subcommittee. NPVLA submitted a written statement in order to present additional facts relevant to the Subcommittee's review of the bill and to attempt to clarify certain erroneous matters and possible misconceptions on the subject which developed during examination of witnesses at the hearings.

Notwithstanding the testimony of medical witnesses at the hearings and the detailed information provided by NPVLA to emphasize that the lead poisoning of children was being caused by ingestion of flakes or chips of old lead-based paint from the walls and ceilings of poorly-maintained pre-World War II dwellings, the House Committee reported out a bill (H.R. 19172) on September 14, 1970 which contained a new provision prohibiting "the use of lead-based paint in all future Federal construction and rehabilitation of any building or structure with Federal assistance in any form."

At this time, NPVLA representatives met with Rep. Barrett and pointed out that his modified bill would deny the proper uses of lead-based paints in industrial areas where its rust-inhibiting qualities were of great importance and where no possible hazard to children now or in the future would exist. Rep. Barrett assured that his Committee did not intend to extend the coverage of his bill to that extent. However, the bill passed the House without further amendment on October 5, 1970, and was referred to the Senate Committee on Labor and Public Welfare.

With this development, NPVLA addressed a letter to the Chairman of the Senate Committee and requested permission to testify "in support of amendments deemed vital to make the bill an effective law responsive to the public need." The issue became further clouded by politics about this time, and a provision in the Senate "Omnibus Housing Bill" (S. 4368) -- limiting the restrictions on use of lead-based paint, as defined, to the interior of dwellings subject to the Act -- was not agreed to by conferees from the House and Senate Banking and Currency Committees. As finally approved by the Congress, the "Omnibus Housing Bill" (Housing and Urban Development Act of 1970) contained no provisions relating to the use of lead-based paint.

0007-SWP-036394

grams to insure that identified cases of lead-based paint poisoning are protected against further exposure to lead-based paints in their living environment and

(4) any other actions which will reduce or eliminate lead-based paint poisoning.

(d) Each local program shall afford opportunities for employing the residents of communities or neighborhoods affected by lead-based paint poisoning, and for providing appropriate training, education, and any information which may be necessary to inform such residents of opportunities for employment in lead-based paint poisoning elimination programs.

TITLE II — GRANTS FOR THE ELIMINATION OF LEAD-BASED PAINT POISONING

SEC. 301. The Secretary of Health, Education, and Welfare is authorized to make grants to units of general local government in any State for the purpose of assisting such units in developing and carrying out programs that identify those areas that present a high risk to the health of residents because of the presence of lead-based paints on interior surfaces, and then to develop and carry out programs to eliminate the hazards of lead-based paint poisoning.

(a) A local program should include:

(1) development and carrying out of comprehensive testing programs to detect the presence of lead-based paints on surfaces of residential housing;

(2) the development and carrying out of a comprehensive program requiring the prompt elimination of lead-based paints from all interior surfaces, porches, and exterior surfaces to which children may be commonly exposed, of residential housing on which lead-based paints have been used as a surface covering, including those surfaces on which non-lead-based paints have been used to cover surfaces to which lead-based paints were previously applied; and

(3) any other actions which will reduce or eliminate lead-based paint poisoning.

(b) Each such program shall—

(1) be consistent with the appropriate local program assisted under section 101, and

(2) afford, to the maximum extent feasible, opportunities for employing the residents of communities or neighborhoods affected by lead-based paint poisoning, and for providing appropriate training, education, and any information which may be necessary to inform such residents of opportunities for employment in lead-based paint elimination programs.

TITLE III — FEDERAL DEMONSTRATION AND RESEARCH PROGRAM

FEDERAL DEMONSTRATION AND RESEARCH PROGRAM

SEC. 302. The Secretary of Housing and Urban Development, in consultation with the Secretary of Health, Education, and Welfare, shall develop and carry out a demonstration and research program to determine the nature and extent of the problem of lead-based paint

0007-SWP-036395

poisoning in the United States, particularly in urban areas, and the methods by which lead-based paint can most effectively be removed from interior surfaces, porches, and exterior surfaces in which children may be commonly exposed of residential housing. Within one year after the date of the enactment of this Act the Secretary shall submit to the Congress a full and complete report of his findings and recommendations as developed pursuant to such program together with a statement of any legislation which should be enacted and any changes in existing law which should be made, in order to carry out such recommendations.

TITLE IV -- PROHIBITION AGAINST FUTURE USE OF LEAD-BASED PAINT

PROHIBITION AGAINST USE OF LEAD-BASED PAINT IN FUTURE CONSTRUCTION AND RENOVATION

SEC. 401. The Secretary of Health, Education, and Welfare shall take such steps and impose such conditions as may be necessary or appropriate to prohibit the use of lead-based paint in residential structures constructed or rehabilitated after the date of enactment of this Act by the Federal government, or with Federal assistance in any form.

TITLE V -- GENERAL DEFINITIONS

SEC. 501. As used in this Act--

(1) The term "State" means the several States, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States;

(2) the term "units of general local government" means: (A) any city, county, township, town, borough, parish, village, or other general purpose political subdivision of a State; (B) any combination of units of general local government in one or more States; (C) an Indian tribe; or (D) with respect to lead-based paint poisoning elimination activities in their urban areas, the territories and possessions of the United States; and

(3) the term "lead-based paint" means any paint containing more than 1 per centum lead by weight (calculated as lead metal) in the total non-volatile content of liquid paints or in the dried film of paint already applied.

CONSULTATION WITH OTHER DEPARTMENTS AND AGENCIES

SEC. 502. In carrying out the authority under this Act, the Secretary of Health, Education, and Welfare shall cooperate with and seek the advice of the heads of any other departments or agencies regarding any programs under their respective responsibilities which are related to, or would be affected by, such authority.

APPROPRIATIONS

SEC. 503. (a) There is hereby authorized to be appropriated to carry out the provisions of title I of this Act not to exceed \$2,330,000 for the fiscal year 1971 and \$4,000,000 for the fiscal year 1972.

(b) There is hereby authorized to be appropriated to carry out the

February 15, 1971

0007-SWP-

provisions of title II of this Act not to exceed \$5,000,000 for the fiscal year 1971 and \$10,000,000 for the fiscal year 1972.

(c) There is hereby authorized to be appropriated to carry out the provisions of title III of this Act not to exceed \$1,875,000 for the fiscal year 1971 and \$3,340,000 for the fiscal year 1972.

(d) Any amounts appropriated under this section shall remain available until expended when so provided in appropriation Acts and any amounts authorized for the fiscal year 1971 but not appropriated may be appropriated for the fiscal year 1972.

Approved January 13, 1971.

LEGISLATIVE HISTORY

HOUSE REPORTS No. 51-102 (Comm. on Banking and Currency) and No. 51-103 (Comm. on Conference).

SENATE REPORT No. 51-102 (Comm. on Labor and Public Welfare).

CONGRESSIONAL RECORD Vol. 116 (1970).

Oct. 1, considered and passed House.
Dec. 17, considered and passed Senate amendment.
Dec. 20, House disagreed to Senate amendment.
Dec. 20, Senate agreed to conference report.
Dec. 21, House agreed to conference report.

It will be noted that Title II of the act authorizes the secretary of Health, Education and Welfare to make grants to units of "general local government in any State" to eliminate existing lead-based paints from "all interior surfaces, porches, and exterior surfaces to which children may be commonly exposed, of residential housing on which lead-based paints have been used as a surface covering. . . This is paint already applied."

Title IV deals with future use of lead-based paint. In short and terse form it directs HEW to "take such steps and impose such conditions as may be necessary or appropriate to prohibit the use of lead-based paint in residential structures constructed or rehabilitated after the date of enactment of this Act by the Federal government, or with Federal assistance in any form."

John Montgomery, general counsel for the National Paint, Varnish and Lacquer Association, who followed the legislation closely from the time it was introduced until the time the act was approved, said that the paint and coatings industry and the raw material suppliers need to be vitally concerned with

the regulations which HEW sets up to implement carrying out of the Title IV directive. The national association already has been in close contact with HEW and has offered to assist in drawing up these regulations. Mr. Montgomery said.

These regulations will be drafted over a period of time, Mr. Montgomery said, "and we will be constantly and swiftly taking such actions as are possible to protect the industry's interests."

Mr. Montgomery said, however, that Title III is of extreme immediate importance, because Congress directs the secretary of Housing and Urban Development to report back within one year after the date of the enactment of the act with certain findings and recommendations regarding lead-based paint poisoning to assist in implementing provisions in Title I and II.

The NPVLA general counsel said that there is much to be done regarding the act. He said that while NPVLA will be watching developments constantly, everyone in the industry should familiarize himself with the provisions of the act and be prepared to give assistance in any way possible to insure that

PROPOSED RULE MAKING

20985

[21 CFR Part 1481]

COMBINATION DRUG CONTAINING NISOMYCN SULFATE AND AMPHOTERICIN FOR ORAL USE

Proposed Revision of Provisions for Certification

In the Federal Register of July 2, 1970 (35 F.R. 10798, DEB 11213), the Commissioner of Food and Drugs announced the conclusions of the Food and Drug Administration following evaluation of reports received from the National Academy of Sciences-National Research Council Drug Efficacy Study Group, on a certain oral preparation containing nisomycin sulfate and nystatin. The drug was recommended as lacking substantial evidence, as defined in the Federal Food, Drug, and Cosmetic Act, that it is effective as a fungicidal combination for its claimed clinical effect and that each component of the drug contributes to the total effects claimed for each drug.

In addition to the section of the antibiotic drug regulations describing conditions for certification of such preparations, another section describes conditions for certification of a related drug, Fungicide Tablets, containing nisomycin sulfate and amphotericin B. An approved Form 3 antibiotic drug application (FDA 68-314) is held for this drug by R. R. Squibb & Sons, Inc., 5 Commerce Road, New Brunswick, N.J. 08901.

This product was not reviewed by the Agency; however, the Food and Drug Administration, having evaluated data originally filed in support of efficacy of this preparation, concludes that there is a lack of substantial evidence, as defined in the Federal Food, Drug, and Cosmetic Act, that this drug is effective as a fungicidal combination for its claimed clinical effects, and that each component of the drug contributes to the total effects claimed for each drug.

Accordingly, the Commissioner concludes that the antibiotic drug regulations providing for certification of such drugs should be revised.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (am. 352, 357, 35 Stat. 1044-51 as amended, 35 Stat. 651 as amended; 21 U.S.C. 352, 357) and under authority delegated to him (21 CFR 3.130), the Commissioner proposes that Part 1481 be amended by revising § 1481.65 *Nisomycin sulfate-amphotericin B tablets*.

Interested persons may, within 30 days after publication hereof in the Federal Register, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-02, 1400 Fishers Lane, Rockville, Md. 20851, written comments (preferably in triplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: October 12, 1971.

Sam D. Fraz,
Associate Commissioner
for Compliance.

[F.R. Doc. 71-18000 Filed 11-1-71; 8:45 am]

[21 CFR Part 191]

HAZARDOUS SUBSTANCES

Proposal To Declare Certain Heavy Metal-Containing Paints and Other Surface-Coatings To Require Special Labeling for Child Protection

The heavy metals antimony, arsenic, cadmium, lead, mercury, selenium and soluble barium may be toxic when ingested, even in small amounts. Because children may chew on interior and certain exterior residential surfaces and on toys and other children's articles, the Commissioner of Food and Drugs concludes that paints and other surface-coating materials are hazardous substances requiring special labeling warning against their use on such surfaces if they contain more of these heavy metals than is essential under good manufacturing practices, or in any event if they contain more than 4.5 percent lead; or a total of 0.50 percent of the other heavy metals listed above on a dried weight basis, except for soluble barium which shall constitute no more than 1 percent of the total barium present. The special labeling to be required shall include on the main panel a cautionary signal word "Warning," a statement of the hazard "Contains _____" (the blank being filled in with the name(s) of the applicable heavy metal(s)) and instructions to read carefully the cautionary information placed on other panel(s) where located. Existing technology will permit industry to produce household paints containing no more of these heavy metals than is specified above. As new technology becomes available, the acceptable levels may be further reduced in accordance with good manufacturing practices.

Although paints containing small amounts of lead in excess of the proposed levels may not be toxic in themselves, when considered in conjunction with other sources of lead in the environment they constitute a substantial addition to the body burden that can reasonably be avoided through the application of available technology. The Commissioner has concluded that the scope of the Federal Hazardous Substances Act fully encompasses the question of cumulative toxicity.

The American National Standards Institute, in its voluntary standard Z39.1, has specified a maximum limit since 1955 of 1 percent lead in paint intended for use on children's toys, furniture, or interior surfaces. A 1-percent lead level was also adopted by Congress in the Lead-Based Paint Poisoning Prevention Act (Public Law 91-603; 84 Stat. 3078), which is administered by the Bureau of Community Environmental Management, Health Services and Mental Health Administration. That act prohibits the use of paint with a lead content above 1 percent in residential structures constructed or rehabilitated by the Federal Government or with Federal assistance. As an additional margin of safety, the

0007-SWP-000117723

PROPOSED RULE MAKING

Commissioner proposes to reduce the exposure to lead found susceptible to children by establishing special labeling requirements for all household paints containing more than 0.5 percent lead. Consideration has been given to the question of whether paints containing lead above the level specified herein should be banned from interstate commerce, or required to bear special labeling warning of the hazard involved and giving instructions for safe use. While there are numerous reports of serious injury and even death resulting from the ingestion of the dried film of old formulations of paints containing high levels of lead, the Commissioner is unaware of any similar reports as a result of ingestion of paints containing 1 percent lead or less. The Commissioner has therefore concluded that cautionary labeling will be adequate to protect the public health and safety from any potential hazards associated with the use of such paints.

Accordingly, under section 3(a) of the Federal Hazardous Substances Act, the Commissioner proposes that paints and other surface-coating materials be declared to be hazardous substances (as defined in section 3(1)(1)(A) of the Act) that require special labeling as specified herein if such paints and other surface-coating materials contain, on a dried weight basis, more than 0.5 percent lead; or a total of more than 0.5 percent antimony, arsenic, cadmium, mercury, or selenium; or soluble barium in excess of 1 percent of the total barium present. Finalization of the regulations proposed herein, in conjunction with section 2(a)(1)(A) of the Federal Hazardous Substances Act, will have the additional effect of automatically banning any toy or other article intended for use by children which is produced after effective date of these regulations and which bears such paint or other surface-coating material.

Therefore, pursuant to provisions of the Federal Hazardous Substances Act (secs. 2(a)(1)(B), 3(a)(1)(A), 3(a), and 2(b)), 16 Stat. 772, 379-378 as amended; 21 Stat. 1364; 15 U.S.C. 1261, 1262; and the Federal Food, Drug, and Cosmetic Act (sec. 701, 21 Stat. 1448 as amended; 21 U.S.C. 371), and under authority delegated to him 21 CFR 1.130), the Commissioner proposes that a new subparagraph be added to § 191.5(a) and that a new subparagraph be added to § 191.7(b), as follows:

§ 191.5 Products declared to be hazardous substances under section 3(a) of the act.

(a) The Commissioner finds that the following articles are hazardous substances within the meaning of the act because they are capable of causing substantial personal injury or substantial illness during or as a proximate result of any customary or reasonably foreseeable handling or use:

(2) Paint and other surface-coating materials, produced or shipped in interstate commerce after the effective date of

this regulation, containing any of the heavy metals specified below at a level exceeding that which is essential under good manufacturing practices or in any event containing amounts of such heavy metals as follows:

(1) Lead compounds of which the lead content (calculated as the metal) is in excess of 0.5 percent of the total weight of the contained solids or dried paint film; or

(2) Antimony, arsenic, cadmium, mercury, and selenium of which the metal content (individually or in total (calculated as the metal)) exceeds 0.5 percent of the total weight of the contained solids or dried paint film; or

(3) Barium compounds of which the water soluble barium (calculated as the metal) exceeds 1 percent of the total barium present.

§ 191.7 Products requiring special labeling under section 3(b) of the act.

(a) The Commissioner finds that these substances present special hazards and that the labeling required by section 3(b)(1) of the act is not adequate for the protection of the public health. Under section 3(b) of the act the following specific label statements are deemed necessary to supplement the labeling required by section 3(b)(1) of the act:

(7) Paint and other surface-coating materials declared to be hazardous under § 191.5(a)(2) shall bear on the main panel of their label, in addition to the requirements of § 191.103(a), the statement "Caution: . . . the blank being filled in with the name of each heavy metal present in the amount specified in § 191.5(a)(2). Such paint and other surface-coating materials shall also bear on their labeling the signal word "Warning," and the following additional statement or its equivalent:

Lead from your paint may be harmful to children or others. . . . Do not apply on toys and other children's articles, furniture, or interior surfaces of any dwelling or nursery which may be occupied or used by children. . . . Do not apply on those articles surfaces or playing areas such as playgrounds, porches, decks, or patios, in which children may be commonly exposed. . . . Keep out of the reach of children."

The blank being filled in with the name of each heavy metal present in the amount specified in § 191.5(a)(2).

Interested persons may, within 60 days after publication hereof in the Federal Register, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 4-26, 5000 Fishers Lane, Rockville, Md. 20855, written comments (preferably in triplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: October 22, 1971.

CHARLES C. HOWARD,
Commissioner of Food and Drug.
(21 Fed. Reg. 10001 Filed 11-1-71; 9:00 am)

[21 CFR Part 191]

BANNED HAZARDOUS SUBSTANCES

Proposal To Classify Paints Containing More Than Minute Traces of Lead

The Commissioner of Food and Drug has received a petition, submitted pursuant to section 701(a)(1)(B) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 371(a)(1)(B)), proposing the issuance of a regulation under sections 2(a)(1)(B) and 3(a)(2) of the Federal Hazardous Substances Act (15 U.S.C. 1261, 1262) classifying as banned hazardous substances paint for household use containing more than minute traces of lead.

The petitioners are Joseph A. Page, Associate Professor at Georgetown University Law Center, Anthony L. Young, student, Mary Wm O'Brien, student, William F. Ryan, U.S. Congressman, Jack Newfield, author, and Edmund O. Rothchild, M.D.

The petitioners propose that § 191.5(a) of the hazardous substances regulations be amended by adding therein a new subparagraph (§ 191.5(a)(6)), as follows:

§ 191.5 Banned hazardous substances.

(a) Under the authority of section 3(a)(1)(B) of the act, the Commissioner declares as banned hazardous substances the following articles because they present such a degree of hazard that adequate cautionary labeling cannot be written and the public health and safety can be served only by keeping such articles out of interstate commerce:

(6) Paint containing lead, except for minute traces which no reasonable manufacturer could preclude from his product, as measured by the atomic absorption method, intended for interior or exterior use and packaged in a form suitable for use in the household as defined by § 191.1(c).

The following is the statement of grounds as presented in the petition:

Secretary of the U.S. Surgeon General William H. Frost, M.D. has been instrumental in the development of red blood cells and in chemical syndromes characterized by anemia and leukopenia. BSW, F.R.C., Bureau of Community Environmental Health, "Control of Lead Poisoning in Children," Publication Draft, 11-1 (December 1970). It is widely known that the adult species absorb the daily intake of lead to the rate of 10 percent (Cannell, J. Fulton, "Toxicologic Aspects" (February 1971)). Thus, assuming the rate of absorption to be the same in

Warning labels are, however, absolutely inadequate to prevent injury to children from lead-based paint. In the United States, many a family has an old house in which the peeling, chipping, and cracking paint has been used to seal the walls of their living quarters. The government that is suffering from lead-based paint poisoning today is using the walls of the churches and the schools. The government that this proposed regulation seems to protect is yet unborn. Their parents are unborn. It would be impossible to substantiate that violation is

CHARLES C. EDWARDS,
Commissioner of Food and Drugs
[FBI Dec.71-10000 Filed 11-1-71;9:42 am]

In responding to a comment from an intermediate vehicle manufacturer, it was noted that while the proposed regulation clearly covers intermediates and final-stage manufacturers (as defined in Part 566) it makes no reference to in-converters vehicle manufacturers. The

Interested persons are invited to submit comments on the proposed amendment. Comments should identify the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 3231, 400 Seventh Street SW, Washington, DC 20590. It is requested but not required that 10 copies be submitted.
