CCN

The minutes of our meeting of March 5, 1987 are noted below.

- A. Steve Powe presented copies of stores gasket catalogs for Institute, South Charleston and Texas City. Service level information for stores items was not readily available.
- B. Sherry Murphree indicated that the West Virginia locations spend about \$312M/yr. on gaskets, gasket materials and packing. Packing accounts for only 5 or 10% of the total. Anticipated expenditures for the next two years are \$800M/yr. The increase is due in part to the anticipated phase out of low cost gasket materials (i.e. asbestos). Report attached.
- C. Al Montero (who was representing CED for Don Kurle) reviewed UCC and industry specifications. It was noted that some UCC specifications referred to manufacturers who no longer manufacture/sell asbestos gaskets/materials.

Al reported that the recommendations (of the EM&TS CED team) covering a C&P program for the phase-out of asbestos in the work place had been approved by C&P Management. Sherry Murphree will participate on the C&P team that will develop implementation plans. (A copy of related correspondence is attached).
