22T-411-L	11"
22T-413-L	13"
22T-418-L	18"
22T-423-L	23"

THERMOBEST MITTEN CONSTRUCTION

Our mittens are reversible. They can be worn on either the right or left hand as the thumb is positioned between the front and back of the mitten.

This reversible feature extends the usable life of the mittens. Unless specified otherwise, reversible mittens are always furnished.

Any style of mittens can be furnished without this reversible feature. To order non-reversible mittens (right and left) place the letter "P" before the style number. (Example: P-22T-111-L)
