Q Have those articles been published in peer-reviewed journals?

A Yes, sir.

Q Are you presently involved in any asbestos -- or have you ever been involved in any asbestos-related research?

A Yes, sir, I have.

Q Can you tell us what areas and what types, please.

A I have been involved in laboratory studies of how asbestos injures cells and how it may lead to developing cancers.

I have done these experiments while at the National Cancer Institute, and I continue to do experiments such as those while at Johns Hopkins.

Q When did your interest in that particular area begin, or how long have you been doing that type of research?

A I really began that type of work while I was at the National Cancer Institute in the early 1980s.

Q Have you continued that research up to the
