Dr. Myer Ezrin
Debell & Richardson Company
Enfield, Connecticut 06030

Dear Dr. Ezrin:

We are sending you (separately) a package of three experimental talcs for DTA analysis. These samples are identified as A, B and C. As we discussed on the phone, we are interested in detecting chrysotile in the $\frac{1}{2}$ percent and greater amount.

Two copies of DTA curves of the 840 to 850 degrees centigrade range are attached for your reference. The one represents the presence of chrysotile and the other the absence (definitely less than 0.5%).

I understand the fee for this work will be at the rate of \$60.00 per sample for a total of \$180.00. Attached is a purchase order, No. NJ18324, for your use.

If there are any questions concerning these samples, please do not hesitate to contact me. Thank you for your consideration.

Very truly yours,

WHITTAKER, CLARK & DANIELS, INC.
